and the few survivors have fled to distant, Earth-like Safehold, to try to rebuild. But the Gbaba can detect the emissions of an industrial civilization, so the human rulers of Safehold have taken extraordinary measures: with mind control and hidden high technology, they've built a religion in which every Safeholdian believes, a religion designed to keep Safehold society medieval forever. 800 years pass. In a hidden chamber on Safehold, an android from the far human past awakens. This "rebirth" was set in motion centuries before, by a faction that opposed shackling humanity with a concocted religion. Via automated recordings, "Nimue" - or, rather, the android with the memories of Lieutenant

Commander Nimue Alban - is told her fate: she will emerge into Safeholdian society, suitably disguised, and begin the process of provoking the technological progress which the Church of God Awaiting has worked for centuries to prevent. Nothing about this will be easy. To better deal with a medieval society, "Nimue" takes a new gender and a new name, "Merlin." His formidable powers and access to caches of hidden high technology will need to be carefully concealed. And he'll need to find a base of operations, a Safeholdian country that's just a little more freewheeling, a little less orthodox, a little more open to the new. And thus Merlin comes to Charis, a mid-sized kingdom with a talent for naval warfare. He plans

come along and transcend the sport they play. But it does happen, every generation or so, someone comes along with skills so finely tuned, that they change the game they play and forever become synonymous with that sport. More than that, their skills and attitudes come to symbolise that sport. For millions of people in Australia and around the world The Don was Australian cricket. Sir Donald Bradman was, beyond any argument, the greatest batsman who ever lived and the greatest cricketer of the 20th century. In that time, his reputation not merely as a player but as an administrator, selector, sage and cricketing statesman only increased." -- Provided by publisher.

(Author's Preface) I should like to state at the beginning of my book that what is stated in it on controversial matters is my own firm opinion, except where in a few cases the views of other people are published and their names given. I wish to make it clear that though there were, and are, sharp differences of opinion on the subject of Fast-Leg-Theory bowling between myself and some Australians, there was always an atmosphere of complete cordiality between the teams on both sides. Although we differ seriously over my Fast-Leg-Theory bowling I have done my best in the following pages not to disturb that atmosphere. Until now my side of the matter has not been heard. I

have refused many tempting offers to break silence. As a fast bowler and a hitter by nature I have written strongly because I cannot express myself otherwise. I hope very much indeed that in doing so, though I was one, of the aggrieved parties in Australia, I have given nobody half the offence from which I suffered so often on the last tour. A belief exists that some of the things I have written about are not yet to be discussed. Obviously I differ from that view. I do so because I feel that in a matter of such vital interest to cricketers as the possible admission by legislation of such a far-reaching principle as that bowlers may not bowl as they like, no cricketer can keep silent. I believe I have only written here

what very many cricketers are saying. But I have written supported by first-hand knowledge. For the many imperfections of style and language in my first book I beg the indulgence of my reader. Yours Sincerely, H. Larwood
