The International Space Station (ISS) is a great international, technological, and political achievement. It is the latest step in humankind's quest to explore and live in space. The research done on the ISS may advance our knowledge in various areas of science, enable us to improve life on this planet, and give us the experience and increased understanding that can eventually equip us to journey to other worlds. As a result of the Station's complexity, few understand its configuration, its design and component systems, or the complex operations required in its construction and operation. This book provides high-level insight into the ISS. The ISS is in orbit today, operating with a crew of three. Its assembly will continue through 2010. As the ISS grows, its capabilities will increase, thus requiring a larger crew. Currently, 16 countries are involved in this venture. The sophisticated procedures required in the Station's construction and operation are presented in Amazing 3D Graphics generated by NASA 104 pages of spectacularly detailed color graphics the Space Station as you've never seen it before!

Jake is a mountain man in 1838 Colorado who finds he is dying from Cancer. He isn't given much time to live, and doc says it is going to be painful. He sends him off with some medicine to help cope with the pain. Instead of going home to die, Jake decides to set out on a last

adventure to find the perfect secluded valley for his final resting place. His best friend, Joe Barnes, won't let him go alone, and he brings along a deaf mute girl named Beth. Along the way they save some children from hostile Indians, guide a wagon train to safety, spend time with old friends, and settle an old score with a past friend.
