I have a zero turn mower w/ 24hp Kawasaki engine, it runs 20 min. then RPMs rise and fall then engine dies on it's own. I gotta wait 3-5min. it starts runs 10-15min. same result. I have changed spark plugs/ALL fuel lines/ fuel filter/fuel pump/carburetor. Most recently adjusted the valves, they were off and this got 5 hrs. straight mowing last week. Today back to the same crap! Ideas please ...

FS, FR & FX Series ...

### Kawasaki Oil Change Reference Chart

HP is what mattes in a mower engine. Torque is almost meaningless in mower engines as it is at its peak far below the 3600 rpm range where these engines are designed to be operated when mowing, and rarely do they get lugged down below 3200 while peak torque comes in down around 22-2400 rpms. What matters is the torque curve, and Kaw shows theirs to be fairly flat while Kohler doesn't show ...

So my questions are regarding these 3 different residential grade engine series; Kawasaki FR series, Kohler 7000 series and Briggs & Stratton Commercial series. These 3 seem to power just about all of the units that I have looked at in this price range. I know that most people will be biased towards or against a certain brand, but I just want to know (of these particular series) if I should ...
