Transparent Wood Could Be the Window of the Future | USDA

The emerging concept of the “window of the future” is more of a multi-functional “appliance in the wall” rather than simply a static piece of coated glass. These façade systems include switchable windows and shading systems such as motorized shades, switchable electrochromic or gasochromic window coatings, and double-envelope window-wall systems that have variable optical and thermal properties which can be changed in response to climate, occupant preferences, and building-system ...

remove mention of 'WCOS' and future devices.

Microsoft accidentally confirms Windows 10's future OS

I have seen the future, and it looks much like Washington State. But let's get there by steps. The Pacific Northwest, for much of its history dominated by the logging and fishing industries, has an aggressive blue-collar tradition. Radical groups like the Industrial Workers of the World – or so-called Wobblies – used to congregate there.

Washington State is a worrisome window into the future ...
