This Dictionary covers information and communication technology (ICT), including hardware and software; information networks, including the Internet and the World Wide Web; automatic control; and ICT-related computer-aided fields. The Dictionary also lists abbreviated names of relevant organizations, conferences, symposia and workshops. This reference is important for all practitioners and users in the areas mentioned above, and those who consult or write technical material. This Second Edition contains 10,000 new entries, for a total of 33,000.

Accurate interpretation of nuclear medicine image data depends upon an understanding of image patterns and quantitative results. This book presents numerous examples which allow the reader to gain an understanding of the interpretation of quality control tests and to recognize artefacts. The examples are not limited to the quality control tests, but include clinical images obtained from unsuspected malfunctioning in the scintillation camera and/or computer system, suboptimal use of the system or operator error.

Thousands of interior design professionals have come to rely onThe Interior Design Business Handbook for comprehensive,accessible coverage of the essential procedures, tools, andtechniques necessary to manage a successful interior designbusiness. The Fifth Edition of this essential resource hasbeen revised to address the latest trends and changes in the field,with new and updated material on business size and structure,building a brand, client development, social networking andInternet marketing, finances, purchasing, technology and softwareprograms, and other key areas. Complete with more than 75 sample forms and letters, thisFifth Edition is a one-stop resource for all aspects ofestablishing and running an interior design business—fromchoosing a location and managing day-to-day operations to growing abusiness and putting it up for sale. All of the techniques andprocedures in the book are rooted in real-world experience and areused daily in successful design firms throughout the UnitedStates. Filled with valuable information for solo practices and smallfirms as well as larger businesses, this book is an indispensableresource for seasoned professionals as well as interior designerswho are at the start of their

career.

The objective of this publication is to provide professionals in nuclear medicine centres with quality assurance procedures for the scintillation camera, computer system and digital image display. It is intended to be a resource for medical physicists, technologists and other healthcare professionals who are responsible for ensuring optimal performance of imaging instruments, particularly SPECT systems, in their respective institutions. It may also be useful to managers, clinicians and other decision makers who are responsible for implementing quality assurance/quality control programmes in nuclear medicine centres.

Breastfeeding is the preferred method of feeding in early life. It is also one of the most cost-effective childhood survival interventions. Breastfeeding practices are important for preventing child mortality and morbidity, as well as ensuring the optimal growth, health, and development of infants. The public health benefits of breastfeeding have been well documented in the medical literature, and include the following: associations with decreased risk for early-life diseases such as otitis media, respiratory tract infection, diarrhoea, and early childhood obesity (to name but a few). This Special Issue book includes a collection of studies on the use of novel methods to improve breastfeeding rates, and research exploring the short- and long-term benefits of breastfeeding for both the infant and mother, including technology-based approaches.

The defence world is a minefield of abbreviations and acronyms. Servicemen soon realize that they must master them, either in tactical situations or in the daily round of staff work, and a larger problem occurs when the area of military technology is entered. Servicemen, civil servants and businessmen all need to be up-to-date with the current jargon if they are to understand their work.

Abu Dhabi's urban development path contrasts sharply with its exuberant neighbour, Dubai. As Alamira Reem puts it, Abu Dhabi, capital of the United Arab Emirates since 1971, 'has been quietly devising its own plans ... to manifest its role and stature as a capital city'. Alamira Reem, a native Abu Dhabian and urban planner and researcher who has studied the emirate's development for more than a decade, is uniquely placed to write its urban history. Following the introduction and description of Abu Dhabi's early modern history, she focuses on three distinct periods dating from the discovery of oil in 1960, and coinciding with periods in power of the three rulers since then: Sheikh Shakhbut bin Sultan Al Nahyan (1960–1966), Sheikh Zayed bin Sultan Al Nahyan (1966–2004), and Sheikh Khalifa bin Zayed Al Nahyan (2004–). Based on archival research, key interviews and spatial mapping, she analyses the different approaches of each ruler to development; investigates the role of planning consultants, architects, developers, construction companies and government agencies; examines the emergence of comprehensive development plans and the policies underlying them; and assesses the effects of these many and varied influences on Abu Dhabi's development. She concludes that, while much still needs to be done, Abu Dhabi's progress towards becoming a global, sustainable city provides lessons for cities elsewhere.

This book includes a selection of articles from The 2019 World Conference on Information Systems and Technologies (WorldCIST'19), held from April 16 to 19, at La Toja, Spain. WorldCIST is a global forum for researchers and practitioners to present and discuss recent results and innovations, current trends, professional experiences and challenges in modern information systems and technologies research, together with their technological development and applications. The book covers a number of topics, including A) Information and Knowledge Management; B) Organizational Models and Information Systems; C) Software and Systems Modeling; D) Software Systems, Architectures, Applications and Tools; E) Multimedia Systems and Applications; F) Computer Networks, Mobility and Pervasive Systems; G) Intelligent and Decision Support Systems; H) Big Data Analytics and Applications; I) Human–Computer Interaction; J) Ethics, Computers & Security; K) Health Informatics; L) Information Technologies in Education; M) Information Technologies in Radiocommunications; and N) Technologies for Biomedical Applications.

The international financial value of Grand Prix racing has grown substantially in recent years. This book will focus upon the massive size, value, importance and impact of the industry. It will also investigate the dominance of UK based Research and Development and design and the development of team strategy and tactics. The authors have based their analysis upon very up-to-date research involving interviews with key individuals at the highest level and visibility within the industry and focus upon the key management themes of teamworking, leadership, strategy and innovation.
