Statistics show that black males are disproportionately getting in trouble and being suspended from the nation's school systems. Based on three years of participant observation research at an elementary school, *Bad Boys* offers a richly textured account of daily interactions between teachers and students to understand this serious problem. Ann Arnett Ferguson demonstrates how a group of eleven- and twelve-year-old males are identified by school personnel as "bound for jail" and how the youth construct a sense of self under such adverse circumstances. The author focuses on the perspective and voices of pre-adolescent African American boys. How does it feel to be labeled "unsalvageable" by your teacher? How does one endure school when the educators predict one's future as "a jail cell with your name on it?" Through interviews and participation with these youth in classrooms, playgrounds, movie theaters,

and video arcades, the author explores what "getting into trouble" means for the boys themselves. She argues that rather than simply internalizing these labels, the boys look critically at schooling as they dispute and evaluate the meaning and motivation behind the labels that have been attached to them. Supplementing the perspectives of the boys with interviews with teachers, principals, truant officers, and relatives of the students, the author constructs a disturbing picture of how educators' beliefs in a "natural difference" of black children and the "criminal inclination" of black males shapes decisions that disproportionately single out black males as being "at risk" for failure and punishment. ? Bad Boys is a powerful challenge to prevailing views on the problem of black males in our schools today. It will be of interest to educators, parents, and youth, and to all professionals and students in the fields of African-American studies, childhood studies, gender studies, juvenile studies, social work, and sociology, as well as anyone who is concerned about the way our schools are shaping the next generation of African American boys.

This pathbreaking study of region, race, and gender reveals how we underestimate the South's influence on the formation of black masculinity at the national level. Many negative stereotypes of black men--often contradictory ones--have emerged from the ongoing historical traumas initiated by slavery. Are black men emasculated and submissive or hypersexed and violent? Nostalgic representations of black men have arisen as well: think of the philosophical, hardworking sharecropper or the abiding, upright preacher. To complicate matters, says Riché Richardson, blacks themselves appropriate these

images for purposes never intended by their (mostly) white progenitors. Starting with such well-known caricatures as the Uncle Tom and the black rapist, Richardson investigates a range of pathologies of black masculinity that derive ideological force from their associations with the South. Military policy, black-liberation discourse, and contemporary rap, she argues, are just some of the instruments by which egregious pathologies of black masculinity in southern history have been sustained. Richardson's sources are eclectic and provocative, including Ralph Ellison's fiction, Charles Fuller's plays, Spike Lee's films, Huey Newton's and Malcolm X's political rhetoric, the O. J. Simpson discourse, and the music production of Master P, the Cash Money Millionaires, and other Dirty South rappers. Filled with new insights into the region's role in producing hierarchies of race and gender in and beyond their African American contexts, this new study points the way toward more epistemological frameworks for southern literature, southern studies, and gender studies.

Defines Black English in the context of African-American culture and lifestyles and tackles the issue of white attitudes toward Black English

Segregation: The Rising Costs for America documents how discriminatory practices in the housing markets through most of the past century, and that continue today, have produced extreme levels of residential segregation that result in significant disparities in access to good jobs, quality education, homeownership attainment and asset accumulation between minority and non-minority households. The book also demonstrates how problems facing minority communities are increasingly important to the nation's long-term economic vitality and global competitiveness as a whole. Solutions to the challenges facing the nation in creating a more equitable society are not beyond our ability to design or implement, and it is in the interest of all Americans to support programs aimed at creating a more just society. The book is uniquely valuable to students in the social sciences and public policy, as well as to policy makers, and city planners.

Challenging the common masculinist character of criminological research, James W. Messerschmidt develops an elaborate scrutiny of the gender roles that, along with class and race, influence the occurrence and types of crimes in our society.

McNeil traces the poor quality of high school instruction to the tensions between the social control purposes of schooling and the schools' educational goals.
