Hardlikesoftware

APEX client-side validation uses the HTML5 constraint

validation attributes and API. You can learn about this native

form validation many places including MDN . PPK has done

extensive research into cross browser support for native form

validation and has written a three part series (2 of 3 complete

as of the time of this article) that provides an excellent tour

and critique of the feature.

APEX Client-Side Validation – HardLikeSoftware

APEX Client-Side Validation. Published Thursday, May 11,

2017 by John Snyders. There is a new little known sorta

feature in APEX 5.1 called client-side validation. You may

have missed it because it is not listed in the release notes

under new features and only mentioned cryptically, almost

tangentially, in the release notes section "Compatibility Mode

Changes in Mode 5.1".

Creating server-side validations in Oracle APEX is simple and fast. Common validations (e.g. not null, is numeric, is a valid date, etc.) are implemented in a declarative way, while other more complex and custom validation logic can be written in SQL or PL/SQL code. Declarative support for client-side validation in APEX is nonexistent.
