King Air Model 90 series in 1961. At that time, the aircraft was designated the Beechcraft Model 120, and was derived from the company's successful "Queen Air" series (a twin-engine piston powered light aircraft produced from 1960 to 1978). The new King Air was to be a "civil utility aircraft", with military variants also to be ...

The Beechcraft King Air family is part of a line of American utility aircraft produced by Beechcraft. The King Air line comprises a number of twin-turboprop models that have been divided into two families. The Model 90 and 100 series developed in the 1960s are known as King Airs, while the later T-tail Model 200 and 300 series were originally marketed as Super King Airs, with the name "Super" being dropped by Beechcraft in 1996. The King Air was the first aircraft in its class and has been in co

Beechcraft King Air - Wikipedia

The King Air F90 is powered by two Pratt and Whitney turboprop PT6A-135 engines, each rated at 750 shp. They are three-stage, axial-flow engines, with a single stage compressor and single-stage reaction turbine. A pneumatic fuel control schedules fuel flow.

About the King Air 90. The Model 90 King Air began its life as the Model 120 in 1961. In May 1963, Beechcraft began test flights of the proof-of concept Model 87, a modified Queen Air with Pratt & Whitney Canada PT6A-6 engines. Two months later Beech publically announced the Model 87 with orders began being accepted for the "King Air" a ...
