Their tests are utilized to detect, asses, prevent and treat heavy metal burden in humans, as well as nutritional deficiencies, gastrointestinal function, hepatic detoxification, metabolic abnormalities, and diseases of environmental origin. Common heavy metals: » Aluminum » Antimony » Arsenic » Barium » Bismuth » Cadmium » Lead » Mercury » Nickel

The most common heavy metals, their sources and their ...

A metal (from Greek ???????? métallon, "mine, quarry, metal") is a material that, when freshly prepared, polished, or fractured, shows a lustrous appearance, and conducts electricity and heat relatively well. Metals are typically malleable (they can be hammered into thin sheets) or ductile (can be drawn into wires). A metal may be a chemical element such as iron; an alloy such as ...
