Pinel encourages interactive learning and
creative thinking. His clear and engaging
presentation makes the material personally
and socially relevant to the reader. For
undergraduate junior/senior level courses in
Behavioral Neuroscience, Physiology of
Behavior, Biopsychology, Human
Neuropsychology, or Physiological Psychology.
Biopsychology is an introduction to the study
of the biology of behavior; it focuses on the
neural mechanisms of psychological processes.
The defining feature of Biopsychology is its
unique combination of cutting-edge
biopsychological science and student-oriented
discourse. Rather than covering topics in the
usual textbook fashion, it interweaves the
fundamentals of the field with clinical case
studies, personal implications, social
issues, helpful metaphors, and memorable
anecdotes.

Biopsychology Explore how the central nervous system governs behaviorBiopsychology presents a clear, engaging introduction to biopsychological theory and research through a unique combination of biopsychological science and personal, reader-oriented discourse. Original author John Pinel and new co-author Steven Barnes address students directly and interweave the fundamentals of the field with clinical case studies, useful metaphors, and memorable anecdotes that make course material personally and socially relevant to readers. In addition to expanded learning objectives that guide students through the course, the Tenth Edition has been thoroughly updated to reflect this rapidly progressing scientific field.

MyLab(tm) Psychology not included. Students, if MyLab is a recommended/mandatory component of the course, please ask your instructor for the correct ISBN and course ID. MyLab should only be purchased when required by an instructor. Instructors, contact your Pearson representative for more information. MyLab Psychology is an online homework, tutorial, and assessment product designed to personalize learning and improve results. With a wide range of interactive, engaging, and assignable activities, students are encouraged to actively learn and retain tough course concepts.

Authored by three of the nation's leading experts on the first-year experience, this Concise Edition of Your College Experience continues a 20-year tradition of straightforward, realistic, and intelligent coverage of the skills students need to succeed in college. Each edition is revised based on information uncovered during exhaustive research, surveys on the First Year Experience, and course outcome measurements. Gardner, Jewler, and Barefoot outline the strategies students need to sharpen their skills in note taking, reading, memorizing, writing, and test-taking; enhance social relationships; get to know themselves better by exploring their values; learn vital information about staying healthy; connect to information on career planning; and more!

understanding child and adolescent psychopathology. The authors provide a logically formatted and easy to understand text that covers the central issues and theoretical and methodological foundations of childhood behavior disorders. Rich with illustrations and examples, this text highlights the newest areas of research and clinical work, stressing supported treatments and the prevention of behavior problems of youth.

Dr. James W. Kalat's BIOLOGICAL PSYCHOLOGY is the most widely used text in the course area, and for good reason: an extremely high level of scholarship, clear and occasionally humorous writing style, and precise examples. Throughout all eleven editions, Kalat's goal has been to make biological psychology accessible to psychology students, not just to biology majors and pre-meds. Another goal has been to convey the excitement of the search for biological explanations of behavior, and Kalat delivers. Updated with new topics, examples, and recent research findings--and supported by new online bio-labs, part of the strongest media package yet--this text speaks to today's students and instructors.
