One of the more routine maintenance jobs you will encounter while owning a E46 involves replacing the drive and serpentine belts. That dreaded "gravel-like" sound hitting the under tray of your 3-Series, followed by the loss of power steering and an increasing engine temperature gauge usually indicates your serpentine belt has snapped.

Reference for the correct fitting position of the drive belt on M43TU or M43B19 e46 BMW engines. Placement is not obvious after the belt is removed nor indicated locally on how to wrap the belt around the various pulleys. This would prove problematic should the belt need replacing in an emergency (by the roadside) or at home.
