Motronic is the trade name given to a range of digital engine control units developed by Robert Bosch GmbH (commonly known as Bosch) which combined control of fuel injection and ignition in a single unit.

Motronic - Wikipedia

Motronic combines the two systems. A computer controls the injection and ignition systems with reference to shared optimization criteria. Digital data processing and micro-processors make it possible to trans- late extensive operating information into program-map-controlled injection and ignition data.

ME7 Tuning Information - Nefmoto

Bosch Port Fuel Injectors (PFI) have a robust design and are capable of using Ethanol fuel (E100). All Bosch fuel injectors released to the aftermarket are OE fit, form and function, and are produced to OE specifications. The Bosch fuel injector has a return rate of 1 part per million (PPM), making Bosch the industry benchmark.

Fuel Injection | Bosch Auto Parts

The article is based on the Original Bosch Motronic system used on the 1987 E28 BMW 535i. While this article is primarily intended as a fuel injection article, it will include testing information for the ignition and other systems related to the Motronic system.

E28 Bosch Motronic Troubleshooting - R3V Limited Forums

The central Motronic computer controls the ignition and fuel injection system. The computer takes input from a variety of sensors placed about the engine. An engine RPM sensor indicates how fast the engine is running. An airflow sensor measures the amount of air that is being drawn into the engine, and thus the amount of load on the engine.

Porsche 911 Motronic Engine Management System Overview ...

Bosch Motronic Ignition Motronic is the trade name given to a range of digital engine control units developed by Robert Bosch GmbH (commonly known as Bosch) which combined control of fuel injection and ignition in a single unit. Motronic - Wikipedia The Motronic system is also a Multipoint system.
