motley collection of older pre-grouping locos. Construction started in 1951. Due to the controversial British Railways' modernisation plan of 1955, where steam traction was abandoned in favour of diesel and electric traction, many of the locomotives' working lives were very short: between 7 and 17 years. Many have been preserved, mainly due to their having been sent to Barry.

British Steam - BR Standard Locomotives:
Kerr, Fred ...

The steam locomotives of British Railways were used by British Railways over the period 1948-1968. The vast majority of these were inherited from its four constituent companies, the "Big Four". In addition, BR built 2,537 steam locomotives in the period 1948-1960, 1,538 to pre-nationalisation designs and 999 to its own standard designs.

The Standard class 6, otherwise known as the Clan Class, was a class of 4-6-2 Pacific tender steam locomotive designed by Robert Riddles for use by British Railways. Ten locomotives were constructed between 1951 and 1952, with a further 15 planned for construction. However, due to acute steel shortages in Britain, the order was continually postponed until it was finally cancelled on the publication of the 1955 Modernisation Plan for the re-equipment of
