This practical and helpful volume details how clinicians can work through various common challenges in individual, couple, or group psychotherapy. Chapters draw upon clinical wisdom gleaned from the author's 48 years as a practicing psychiatrist to address topics such as using countertransference for therapeutic purposes; resistance, especially when it needs to be the focus of the therapy; and a prioritization of exploration over explanation. Along with theory and clinical observations, Dr. Gans offers a series of "Clinical Pearls," pithy comments that highlight different interventions to a wide range of clinical challenges. These include patient hostility, the abrupt and unilateral termination of therapy, the therapist's loss of compassionate neutrality when treating a couple, and many more. Many of the "Clinical Pearls" prioritize working in the here-and-now. In addition to offering advice and strategies for therapists, the book also addresses concerns like the matter of fees in private practice and the virtue of moral courage on the part of the therapist. Written with clarity, heart, and an abundance of clinical wisdom, *Addressing Challenging Moments in Psychotherapy* is essential reading for all clinicians, teachers, and supervisors of psychotherapy.

The stirring conclusion to *The Soldier Son Trilogy*—the acclaimed epic tale of duty, destiny, and magic by New York Times bestselling master fantasist Robin Hobb Loyal, privileged, and brave, Nevare Burvelle proudly embraced his preordained role as soldier in the service of the King of Gernia—unaware of the strange turns his life would ultimately take. Exposed to a plague of enemy sorcery that felled many of his compatriots, he prevailed, but at a terrible cost to his soul, body, and heart. Now he stands wrongly accused of unspeakable crimes—including murder, the most heinous of them all. Condemned by his brother soldiers and sentenced to death, Nevare has no option but to escape. Suddenly he is an outcast and a fugitive—a hostage to the Speck magic that shackles him to a savage alter ego who would destroy everything Nevare holds dear. With nowhere to turn—except, perhaps, to the Speck woman Lisana, the enemy whom he loves—he is mired in soul-rending despair. But from out of the darkness comes a bright spark of hope. Perhaps, somehow, the hated magic that has long abused Nevare can be used by him instead. Could he not learn to wield this mighty weapon for his own purposes rather than be enslaved by it? But down what perilous road will this desperate new quest lead him? And what will be the outcome and the ultimate new incarnation of Nevare Burvelle?

Tunnels and Underground Cities: Engineering and Innovation meet Archaeology, Architecture and Art. Volume 10: Strategic use of underground space for resilient cities contains the contributions presented in the eponymous Technical Session during the World Tunnel Congress 2019 (Naples, Italy, 3-9 May 2019). The use of underground space is continuing to grow, due to global urbanization, public demand for efficient transportation, and energy saving, production and distribution. The growing need for space at ground level, along with its continuous value increase and the challenges of energy saving and achieving sustainable development objectives, demand greater and better use of the underground space to ensure that it supports sustainable, resilient and more liveable cities. The contributions cover a wide range of topics, from investing in urban underground space, via effective use of underground space for sustainable cities, and the use of new energy carriers to the compound use of underground space for integrated campus-urban development. The book is a valuable reference text for tunnelling specialists, owners, engineers, archaeologists, architects, artists and others involved in underground planning, design and

building around the world, and for academics who are interested in underground constructions and geotechnics.

On a warm September night in 2002, former acquaintances Alexis Maybank and Alexandra Wilkis reconnected at a mixer for new students at Harvard Business School. Alexis had just ended a four-year run at eBay during the dotcom boom and bust. Alexandra had just spent three years as an investment banker at Merrill Lynch. Now they were entering the country's top training ground for future titans of Wall Street and the Fortune 500. Little did either suspect that five years later, they'd become famous not in finance or consulting or corporate management, but at the bleeding-edge intersection of fashion and technology. Gilt Groupe – launched by Alexis, Alexandra, and three colleagues in 2007 – is one of the most fascinating startups of recent years, with a valuation of more than \$1 billion. And it all began with one bold idea: to bring sample sales online and change the way millions shop. As Alexis and Alexandra write about the day Gilt.com went live: “We had created a website that could potentially change the rules of retail, for both shoppers and brands. If shopping was traditionally a slow, leisurely activity that might consume an entire day, it would now be competitive, addictive, urgent, thrilling—a rush delivered at the same time each day. Shopping would become not just easier, but so much fun.” But turning that vision into reality wasn't easy. Designers had long controlled their own sample sales by staging them in anonymous, makeshift locations and strictly limiting invitations. Those lucky enough to hear about a Marc Jacobs or Hermès sample sale would drop everything and run for dramatic, fleeting bargains. Why should elite brands support a new

startup trying to replicate the experience online? And even if brands like Valentino, Christian Louboutin, and Zac Posen got on board, would shoppers embrace such a website? Would the kind of people who love high-end fashion really visit a new online sale each day? Was “accessible luxury” a breakthrough idea or an absurd oxymoron? Alexis and Alexandra share their perspective in this dramatic story of Gilt’s birth, rise, and evolution. They show how they juggled the conflicting needs of their suppliers, engineers, marketers, and potential investors. They explain how they blended their individual strengths and weaknesses and managed their rapidly growing team. They cover the growing pains of expanding into new categories like housewares, travel, and menswear. And they take us through the darkest moments of the recession when Gilt might easily have died. As you’ll learn from the true story of Gilt, anything is possible for those with the creativity to recognize a new opportunity and the perseverance to make it real.

This “marvelously absorbing” book is “a walk on the wild side of words and ventures into the zone where language and mathematics intersect” (San Jose Mercury News). A former Wall Street Journal reporter and NPR regular, Stefan Fatsis recounts his remarkable rise through the ranks of elite Scrabble players while exploring the game’s strange, potent hold over them—and him. At least thirty million American homes have a Scrabble set—but the game’s most talented competitors inhabit a sphere far removed from the masses of “living room players.” Theirs is a surprisingly diverse subculture whose stars include a vitamin-popping standup comic; a former bank teller whose intestinal troubles earned him the nickname “G.I. Joel”; a burly, unemployed African American from Baltimore’s inner city; the three-time national champion who plays according to Zen principles; and the author himself, who over the course of the book is transformed from a curious reporter to a confirmed Scrabble nut. Fatsis begins by haunting the gritty corner of a Greenwich Village park where pickup Scrabble games can be found whenever weather permits. His curiosity soon morphs into compulsion, as he sets about memorizing thousands of obscure words and fills his evenings with solo Scrabble played on his living room floor. Before long he finds himself at tournaments, socializing—and competing—with Scrabble’s elite. But this book is about more than hardcore Scrabblers, for the game yields insights into realms as disparate as linguistics, psychology, and mathematics. Word Freak extends its reach even farther, pondering the light Scrabble throws on such notions as brilliance, memory, competition, failure, and hope. It is a geography of obsession that celebrates the uncanny powers locked in all of us, “a can’t-put-it-down narrative that dances between memoir and reportage” (Los Angeles Times). “Funny, thoughtful, character-rich, unchallengeably winning writing.” —The Atlantic Monthly This edition includes a new afterword by the author.

The difference between helping and selling is just two letters If you're wondering how to make your products seem more exciting online, you're asking the wrong question. You're not competing for attention only against other similar products. You're competing against your customers' friends and family and viral videos and cute puppies. To win attention these days you must ask a different question: "How can we help?" Jay Baer's Youtility offers a new approach that cuts through the clutter: marketing that is truly, inherently useful. If you sell something, you make a customer today, but if you genuinely help someone, you create a customer for life.
