There's certainly room for more thinking about how to shape the relief bill to reform higher education. But I'll leave it at that. The important point is that we must put an end to business as usual. Over the last two months we have seen university politics take over the streets of many American cities.

education sector from elite to mass education with the number of graduates having quadrupled to three million a year over six years. China is exceptional among lower income countries in using tertiary education as a development strategy on such a scale, aiming to improve the quality of its graduates, and make HE available to as many of its citizens as possible. This book provides a critical examination the challenges to the development and sustainability of higher education in China: Can its universities move from quantity to quality? How will so many graduates find jobs

In place of a distributive justice perspective which focuses simply on equal access to universities, this book presents a broader understanding of the relationship between Chinese higher education and economic and social change. The necessity for research on the place of universities in contemporary Chinese society may be seen from current debates about and policy towards issues of educational inequality at Chinese universities. Many questions arise as a consequence: What are the limitations of neo-liberalism in higher education policy and what are the alternatives? How has the

How may higher education enhance social justice in Chinese society given economic, social, and cultural inequality? What may be learned from the experience of Macau, Hong Kong, and of Taiwan in terms of achieving social justice in Chinese universities? These questions are considered by a group of leading scholars from both inside and outside China.
