Comprehension On Natural Resources Edbl

In summary, natural resources are things existing freely in nature, and include renewable and non-renewable things. Some of the resources are organic, meaning they come from living things, such as animals and plants. Other resources are inorganic, coming from non-living things, such as wind, rocks, and fossil fuels.

Using recycled paper conserves natural resources. As our worldwide population grows, the strain on these resources becomes even greater. You can drastically reduce the number of trees cut down for manufacturing paper. In addition to saving landfill space, you cut down on your expenses of trash-disposal.
