The book examines the challenges and limits of contemporary ijthad in the context of diverse needs of Muslim cultures and communities living in Muslim and non-Muslim nations and continents, including Europe and North America.

The resurgence of Islam, geopolitical crises involving Muslim nations, violence associated with Islam and the immigration of millions of Muslims to Western countries have generated a strong interest in understanding Islamic law. The challenges of these new realities have impressed upon Muslims the need to rethink classical jurisprudence and a powerful contemporary ijthad - the process of making a legal decision by independent interpretation of the legal sources - has unleashed a tremendous intellectual energy that is transforming legal systems across the Muslim world. This book explores the limits and controversies of this development in the context of the diverse needs of Muslim cultures and communities living in Muslim and non-Muslim nations and continents including Europe and North America -- Book jacket

Many in the West think that they know about Islamic law and its system of governance. But they are victims of the illusion of knowledge. They receive false knowledge from Islamophobics who refuse to acquire or acknowledge true knowledge. Misapplication of Islamic law and its system of governance in many Muslim majority states re-enforces this false knowledge. Misunderstanding must be illuminated with knowledge. Islamic law and its system of governance misapplication must be clarified. This is the goal of the book. Because this book utilizes only the most authentic sources of Sunni Islam to defeat ignorance, it poses a great challenge to the Islamophobia's demagogue. This book uproots years of Islamophobic work seeking to spread ignorance and hatred of Islam. To be sure, this book is neither an apology, propaganda, nor a work of advocacy. It aims only to illustrate what Sunni Muslims believe of Islamic law and its ideal system of governance. Neither wrong practices of Islamic law and its system of governance nor the smokescreen of Islamophobia should control our understanding of the subject matter. A simple analogy may clarify the issue at hand. A distinction ought to be made between the car and the driver. A distinction must be made between Islamic law and its system of governance on one hand and the common misunderstandings and misrepresentation by Muslim majority States.

A distinction must be made between Islamic law and its system of governance on one hand and the common misunderstandings and misrepresentation by Muslim majority States.

The popularity of the Muslim League and its idea of Pakistan has been measured in terms of its success in achieving the goal of a sovereign state in the Muslim majority regions of North West and North East India. It led to an oversight of Muslim leaders and organizations which were opposed to this demand, predicating their opposition to the League on its understanding of the history and ideological content of the Muslim nation. This volume takes stock of multiple narratives about Muslim identity formation in the context of debates about partition, historicizes those narratives, and reads them in the light of the larger political milieu of the period. Focusing on the critiques of the Muslim League, its concept of the Muslim nation, and the political settlement demanded on its behalf, it studies how the movement for Pakistan inspired a contentious, influential conversation on the definition of the Muslim nation.

Mona Samadi examines the sources of gender differences within the Islamic tradition, with particular focus on guardianship, and describes the opportunities and challenges for advancing the legal status of women.

This book brings together international scholars of Islamic philosophy, theology and politics to examine these current major questions: What is the place of pluralism in the Islamic founding texts? How have sacred and prophetic texts been interpreted throughout major Islamic intellectual history by the Sunnis and Shia? How does contemporary Islamic thought treat religious and political diversity in modern nation states and in societies in transition? How is pluralism dealt with in modern major and minor Islamic contexts? How does modern political Islam deal with pluralism in the public sphere? And what are the major internal and external challenges to pluralism in Islamic contexts? These questions that have become of paramount relevance in religious studies especially during the last three-four decades are answered as critically highlighted in Islamic founding sources, the formative classical sources and how it has been lived and practiced in past and present Islamic majority societies and communities around the world. Case studies cover Egypt, Turkey, Indonesia, and Thailand, besides various internal references to other contexts.

A Theory of Universal Democracy empowers cultures and communities across the world to custom design democracy in consonance with their traditional values. For example, the book makes concrete proposals for Muslim countries to democratize their constitutions without accepting Western values and without violating the principles of Islamic law. More importantly, Universal Democracy further develops the idea of Free State, which the author first presented in his previous book, The Extinction of Nation-States (Kluwer, 1996). The proposed fusion of Universal Democracy and Free State is designed to revolutionize the classical theory of government and to offer a new paradigm that accommodates both universality and uniqueness. Scholars, teachers and students of international law, constitutional law, legal theory, and Islamic law will find this book a source of valuable ideas.

Since the 1980s, Muslim women reformers have made great strides in critiquing and reinterpreting the Islamic tradition. Yet these achievements have not produced a significant shift in the lived experience of Islam, particularly with respect to equality and justice in Muslim families. A new approach is needed: one that examines the underlying instruments of tradition and explores avenues for effecting change. In Islamic Interpretive Tradition and Gender Justice leading intellectuals and emerging researchers grapple with the problem of entrenched positions within Islam that affect women, investigating the processes by which interpretations become authoritative, the theoretical foundations upon which they stand, and the ways they have been used to inscribe and enforce gender limitations. Together, they argue that the Islamic interpretive tradition displays all the trappings of canonical texts, canonical figures, and canon law – despite the fact that Islam does not ordain religious authorities who could sanction processes of canonization. Through this lens, the essays in this collection offer insights into key issues in Islamic feminist scholarship, ranging from interreligious love, child marriage, polygamy, and divorce to stoning, segregation, seclusion, and gender hierarchies. Rooting their analysis in the primary texts and historical literature of Islam, contributors to Islamic Interpretive Tradition and Gender Justice contest oppressive interpretative canons, subvert classical methodologies, and provide new directions in the ongoing project of revitalizing Islamic exegesis and its ethical and legal implications.

In the second half of the twentieth century, alongside the evolution of the global economy, modern technology, rapid transportation and multinational enterprises, there was an increased demand for a dispute resolution mechanism that met the needs of traders, international trade and economic policy-makers. Arbitration as an alternative dispute resolution has significantly gained in popularity in the Arab Gulf States over the past two decades or so. This is no doubt reason enough to take a closer look at the main theme that defines arbitration in this region. National courts of the Arab Gulf states are invariably seen as not very arbitration friendly, some possibly even hostile to arbitration. Public order, alongside the Islamic legal traditions, is seen as unruly horse that could possibly undermine the development of international commercial arbitration in this region. The contribution in this book will go some way toward dissipating the concerns that are routinely raised about the procedural and practical soundness of arbitration in the Arab Gulf states. In addition, the book serves to place arbitration in the Arab Gulf states in its present legal systems, national laws and courts practices.
