with developing and implementing security measures to reevaluate current methods for safeguarding the judicial process. Presented in four sections, the first discusses perpetrators planning an attack and reviews types of perpetrators, target selection, tactics, operations styles, the mechanics of violent attacks, and thwarting attacks. Section two discusses in much detail a multitude of integrated security systems now available for court facilities. The third section presents effective response mechanics for courthouse violence, and the final section reviews tactical considerations for training, containment, and responding to explosive devices. The text serves as a substantial resource in providing the most current state-of-the-art information on security operations and technologies in a very clear but in-depth format. The ultimate goal of this book is to emphasize that court security in today's world must be constantly reexamined, revamped,
