A review of the literature is given in this chapter and the results indicate that the use of standards is common in conservation research and practice of cultural property made of metals for corrosion studies, coatings and corrosion inhibitors testing, cathodic protection, corrosion monitoring, materials used to store or display metal objects, etc.

The role of standards in conservation methods for metals ... Conservation and restoration of metals is the activity devoted to the protection and preservation of historical (religious, artistic, technical and ethnographic) and archaeological objects made partly or entirely of metal. In it are included all activities aimed at preventing or slowing deterioration of items, as well as improving accessibility and readability of the
