Ing. Joseph Amato was born on the island of Malta during the years of WWII and started his sailing days while the island was a major British naval base in the Mediterranean. Having received his education at St. Augustine's College and later his engineering apprenticeship at the then Royal Naval Dockyard in Malta, he went on to follow a thirty-year sea-going career in the British Mercantile Marine, starting from coastal British and European ports, Baltic and Irish seas as far as Spitzbergen, Greenland and Icelandic ports. At twenty-nine years he obtained his class I, followed with a tanker endorsement on steam and motor propulsion and moved on to deep sea shipping, engaging himself on long distance voyaging, and as requested by various shipping companies. Now Joseph has retired from "pushing" tankers (VLCC) around the globe and prefers to enjoy his days afloat, propelled by the wind on his ketch-rigged sailing boat.

By the end of the twentieth century there were some half-million tractors on British farms - more machines than people to drive them. Brian Bell's encyclopaedic book traces the evolution of the farm tractor from the days of starting handle and pan seat to current 4-wheel drive machines with air-conditioned cabs and computer management systems. He deals in particular with developments of the classic period from the 1950s to the 1990s. The book is arranged alphabetically by manufacturer from Allis-Chalmers to Zetor, one hundred marques in total. These are all machines to be found on British farms irrespective of their country of manufacture. Brian runs concisely through the histories of the companies and their major models, illustrated with a wealth of photographs and extracts from sales literature. He adds some special features on items such as hydraulic systems and cold-starting aids. He includes a glossary and full index. This book replaces the author's earlier, successful, Fifty Years of Farm Tractors. Many of the photographs are new and the text has been brought up to date to include developments of the early twenty-first century.
