The book emphasizes that derivation of a mechanism is not a theoretical procedure, but a means of applying knowledge of other similar reactions and reaction conditions to the new reaction. n Brief summaries of required basic knowledge of organic structure, bonding, stereochemistry, resonance, tautomerism, and molecular orbital theory n Definitions of essential terms n Typing and classification of reactions n Hints (rules) for deriving the most likely mechanism for any reaction

This book is a printed edition of the Special Issue "Food Proteins and Bioactive Peptides" that was published in Foods

As the water rose in his village during the floods in Bihar forcing him and his family to live in tents, Chiranjeev dreamt of a future working in a plush office in a city. Hundreds of kilometres away in Chhattisgarh, Sudoku whizkid Vipul focused on the International Physics Olympiad and winning a top rank in the All-India Joint Entrance Examination. Success would mean a coveted seat in one of the Indian Institutes of Technology-not to mention celebrity status amongst peers and in the family. With an acceptance ratio far lower than Harvard or MIT, the IIT JEE (or JEE Advanced) is one of the most competitive exams in the world. So how do the toppers succeed? Are there smart ways to prepare for the exam? How does the students' quest transform the lives of their families? Through extensive interviews with JEE top rankers, pioneering teachers and the many students who had to fight extraordinary odds to get into an IIT, Soum Paul, entrepreneur and IIT Kanpur alumnus, puts together stories of fierce competition, incredible hard work and sacrifice. A fascinating account of the battle of a million brains.
