This manual is a complete guide to medical laboratory techniques used in medical microbiology, haematology, clinical biochemistry, histopathology, human genetics and molecular biology. With the help of detailed images and illustrations, the authors discuss common tests such as blood glucose estimation and simple microscopy, as well as more sophisticated tests such as high performance liquid chromatography. For each test, the principles, methods, results, norms and interpretations are described.

Everyday in Europe, people associated with Roma or Traveller communities are exposed to acts of discrimination and exclusion on a scale that has stopped shocking people and institutions. Too often, it is only when lives are claimed that we wake up to the persistence of realities that have no place in any democratic society. Antigypsyism is a term used to refer to the multiple forms of biases, prejudice and stereotype that motivate the everyday discriminatory behaviour of institutions and many individuals towards Roma. Antigypsyism is a form of racial discrimination. Most antigypsyism acts are illegal and contrary to human rights, even when they are not prosecuted, and even if they are widespread and often ignored or tolerated. Antigypsyism undermines the moral fabric of societies. Democracy and human rights cannot take root where discrimination is institutionalised, tolerated or conveniently ignored. Education plays a central role in combating and overcoming antigypsyism because the result of centuries of prejudice cannot be fought by laws and courts alone. Human rights education – learning for, through and about human rights – provides an ideal approach to raising awareness about antigypsyism and promoting a culture of universal human rights. This manual was produced within the Roma Youth Action Plan of the Council of Europe to provide teachers, trainers and facilitators of non-formal education processes with essential information and methodological tools to address antigypsyism with young people of all ages and in any social-cultural setting. It is equally suitable for work with groups of non-Roma, Roma only, or mixed groups. Combating antigypsyism is a task for all of us; learning about it is a necessary starting point. As human beings we have the capability to discriminate and impose prejudice upon others. Fortunately, we are also capable to learn and change. *Mirrors* is a great help to help us notice this, correct distorted views and to recognise ourselves in the eyes of others.

This revised edition of *Bookmarks* reflects the end of the coordination of the youth campaign by the Council Europe. The campaign may be officially over, but the education and awareness-raising to counter hate speech and promote human rights values remain an urgent task for young people of all ages. The work of the Council of Europe for democracy is strongly based on education: education in schools, and education as a lifelong learning process of practising democracy, such as in non-formal learning activities. Human rights education and education for democratic citizenship form an integral part of what we have to secure to make democracy sustainable. Hate speech is one of the most worrying forms of racism and discrimination prevailing across Europe and amplified by the Internet and social media. Hate speech online is the visible tip of the iceberg of intolerance and ethnocentrism. Young people are directly concerned as agents and victims of online abuse of human rights; Europe needs young people to care and look after human rights, the life insurance for democracy. *Bookmarks* was originally published to support the No Hate Speech Movement youth campaign of the Council of Europe for human rights online. *Bookmarks* is useful for educators wanting to address hate speech online from a human rights perspective, both inside and outside the formal education system. The manual is designed for working with learners aged 13 to 18 but the activities can be adapted to other age ranges.
