Forest Ecology and Management | Journal | ScienceDirect ...

The River Ecology and Management Team conducts basic and applied research on many aspects of aquatic ecosystems. We focus on fluvial systems, from small streams to large rivers, with a particular emphasis on solving real-world conservation problems for aquatic species. Recent large projects have focused on fish migration and fish passage, life history research on migratory species, winter ecology, forest-stream interactions, and fish-mussel host-parasite ecosystems.

River ecology and management | Karlstad University

Ecology is as much a biological science as it is a human science. Human ecology is an interdisciplinary investigation into the ecology of our species. "Human ecology may be defined: (1) from a bioecological standpoint as the study of man as the ecological dominant in plant and animal communities and systems; (2) from a bioecological standpoint as simply another animal affecting and being affected by his physical environment; and (3) as a human being, somehow different from animal life in ...
