~~Ecosystems And Biomes Guided Study~~

Ecology: The study of connections in life Ecosystem: A system involving the interactions between a community of living organisms in a particular area and its nonliving environment. Ecosystems are dynamic: composed of biotic and abiotic components that interact with earth other. Life exists on the land systems (called biomes) and in freshwater and ocean aquatic life zones.

~~Ecosystems & Biomes - Videos & Lessons | Study.com~~

You can consider the whole rain forest an ecosystem, or maybe you just want to study, maybe you just want to study what's happening in this exact region, right over there. You can also consider that an ecosystem. You can consider what's happening in the river, itself, an ecosystem, or, maybe, one part of that river.

~~Ecosystems and Biomes Biogeography~~ Ms. Venn

Biomes: StudyJams! Science | Scholastic.com. The Earth is divided into six major kinds of large ecosystems, or biomes.

The major difference between each biome is climate. The biomes are taiga, tundra, deciduous forest, tropical rainforest, desert, and grassland.
