From the first time a physics textbook is opened, some basic principles will need to be covered and understood. Newton's first law of motion states that an object at rest will remain at rest unless acted on by an outside force. While physics is evolving every day, the understanding we have of the basic theories of physics came from one man in the 17th century, Sir Isaac Newton. Newton's first law of motion states that an object at rest will remain at rest unless acted on by an outside force.
