Mammalian Characteristics Fetal Pig

FETAL PIG DISSECTION Background: Mammals are vertebrates having hair on their body and mammary glands to nourish their young. The majority are placental mammals in which the developing young, or fetus, grows inside the female's uterus while attached to a membrane called the placenta. The placenta is the source

FETAL PIG DISSECTION

Measure your pig's length from the tip of its snout to the base of its tail. Use the length/age chart to determine the age of your fetal pig & record this. Gestation for the fetal pig is 112-115 days. The length of the fetal pig can give you a rough estimate of its age. If your pig is bigger than 300mm- it is ready for birth. 21 days - 11 mm

Fetal Pig Dissection

Fetal pigs are the unborn piglets of sows that were killed by the meat packing industry. These pigs are not bred and killed for this purpose, but are extracted from the deceased sow's uterus. Fetal pigs not used in classroom dissections are often used in fertilizer or simply discarded. [1]
