Food Security, Poverty and Nutrition Policy Analysis---

Poverty, Health, and Nutrition (PHND) Poverty, food insecurity, and poor nutrition and health are among the most pernicious problems eroding quality of life and limiting economic productivity. IFPRI's Poverty, Health, and Nutrition Division (PHND) examines the main drivers of these problems and identifies effective strategies to improve the lives of poor populations in developing countries.

Poverty, Health, and Nutrition (PHND) | IFPRI---

Food security is when the entire population of a country has access to enough safe and nutritious food to maintain an active life. The opposite is food insecurity, which is a problem for lots of...

Factors affecting food security — Food security — a global---

Poverty, food insecurity, and poor nutrition have serious consequences for the health and well-being of children, adults, and older adults, including a greater risk for chronic disease and poor mental health.

Hunger & Health The Impact of Poverty, Food Insecurity---

The second of the UN's 17 SDGs is to " End hunger, achieve food security and improved nutrition and promote sustainable agriculture." Achieving this goal by the target date of 2030 will require a...

Food | United Nations

Failing to ensure good nutrition in the critical first 1,000 days of life (from conception to a child's second birthday) harms children's physical and cognitive development and can have other lasting consequences, including undereducation and lowered economic productivity. IFPRI's nutrition research focuses on addressing all forms of malnutrition through strengthening and rigorously evaluating multisectoral programs and policies that aim to improve the diets, nutritional status, and ...

Poverty, Food Security, Open Data and COVID-19 | GODAN

In this Decade of Action for sustainable development, ending hunger, achieving food security, improving nutrition, and promoting sustainable agriculture must remain key priorities. To ensure that all people, in particular the poor, have access every day to safe, nutritious and sufficient food, the international community must make the effective elimination of hunger "one of its foremost and imperative goals."

Vatican at UN: Agricultural development, food security and---

According to FAO, chronic under nutrition and food insecurity are principally caused by a combination of factors such as low agricultural productivity, high seasonal and year to year variability in food supplies and lack of off-farm employment opportunities.

FOOD SECURITY: A STRATEGY FOR POVERTY ALLEVIATION IN NIGERIA:

While food production at the national level routinely exceeds domestic requirements, the availability of and access to adequate nutritious food remains a challenge for many poor households, which is compounded by the country's over-reliance on maize.

Zambia | World Food Programme

Undernutrition rates are high, especially in rural districts where diets lack diversity - maize being the main staple - and are poor in essential nutrients. A Zero Hunger Strategic Review of the food security situation carried out in 2015 highlighted the root causes of hunger, the gaps in support, and the areas where WFP could add value.

Zimbabwe | World Food Programme

This BRIDGE Cutting Edge Overview Report makes the case for a new, gender-aware understanding of food security, arguing that partial, apolitical and gender-blind diagnoses of the problem of food and nutrition insecurity is leading to insufficient policy responses and the failure to realise the right to food for all people.

Gender and Food Security | BRIDGE

The State of Food Security and Nutrition in the World is the most authoritative global study tracking progress towards ending hunger and malnutrition. It is produced jointly by the Food and ...
