THE FRESHWATER ALGAL FLORA
OF THE BRITISH ISLES PDF

Most species of algae in freshwater lochs are microscopic in size, though some types of algae – stoneworts – form larger growths or colonies.

Microscopic algae may be either: free-

Chinese Algae Eaters need at least 30

Get Free Fresh Water Algal Flora Of Andaman And

gallons of space with a pH of around 6.5 to 7.5 and a temperature between 74 and 80 degrees. Typically, Chinese Algae Eaters spend their time at the bottom of the tank searching for algae to eat. As a result, you need to decorate the bottom of your tank with fine sand, lots of plants, and more. 13.
