When love simmers between a reclusive scientist and a wealthy debutante, will they abandon ship or is it full steam ahead? Nicole Renard returns home to Galveston, Texas, to find her father deathly ill. Though she loves him, Nicole's father has always focused on what she's not. Not male. Not married. Not

able to run Renard Shipping. Vowing to find a suitable husband to give her father the heir he desires before it's too late, Nicole sets out with the Renard family's greatest treasure as her dowry: the highly coveted Lafitte Dagger. But her father's rivals come after the dagger, forcing a change in Nicole's plans. After a boiler explosion aboard the Louisiana nearly took his life, Darius Thornton has been a man obsessed. He will do anything to stop even one more steamship disaster. Even if it means letting a female secretary into his secluded world. Nicole is determined not to let her odd employer scare her off with his explosive experiments, yet when respect and mutual attraction grow between them, a new fear arises. How can she acquire an heir for her father when her heart belongs to another? And when her father's rivals discover her hiding place, will she have to choose between that love and her family's legacy?

NEW EDITION, REVISED AND UPDATED The first edition of Full Steam Ahead!—an international bestseller that was translated into twenty-two languages—pioneered the concept of vision as the vital ingredient for truly satisfying long-term success. In this new edition, Ken Blanchard and Jesse Lyn Stoner offer new content and new resources to help you create and communicate a vision that will radically transform your work and your life. When do we need vision? During times of growth, change, or opportunity—so that we know we're headed in the right direction. We also need vision during times of uncertainty—when we've lost confidence in our leaders, our institutions, or ourselves. Instead of focusing on "what's next," we need to refocus on "what's first." Getting back to the basics means knowing who you are, where you're going, and what will guide your journey—having a vision. This is the place from which we must start (or revisit) if we want to thrive. When work is meaningful and connected to what we truly desire, we tap into a productive and creative power stronger than we ever imagined. Ken Blanchard and Jesse Stoner show how to create a vision for your organization, and for your own life, that will unleash your power and potential and allow you to go Full Steam Ahead! They offer numerous examples of effective visions and show exactly how to create an enduring vision that will guide you on a daily basis. The lessons of Full Steam Ahead! are revealed through the inspirational story of two people who are able to create a vision for the place they work and for their own lives. Together they discover the three elements of a compelling vision: a significant purpose, a picture of the future, and clear values. By understanding how a vision is created, communicated, and lived, they discover how to make a vision come alive.

How to be a STEAM thinker. Sydney and Simon are twin mice on a mission. They want to enter their flowers in the neighborhood flower show, but the flowers in the window box are wilting in the city heat, and the window is jammed. How are they going to get water to their blossoms so they'll live and flourish in time for the show? Sydney and Simon are lucky to be growing up in a curious and creative family and are encouraged to ask questions, experiment, and record their findings through writing, art, music, and video. Their mother is a scientist and their father is a poet. Their family motto is: "When the going gets tough, the creative get going." Utilizing the S.T.E.A.M. (Science, Technology, Engineering, Arts, and Math) philosophy of learning, this brightly illustrated story shows how an interdisciplinary studies model helps Sydney and Simon achieve their goals. In a practical, fun, and hands-on way, young readers will be inspired to interact with their own natural learning skills and start experiencing the world—and their education—in a whole new way.

Explaining the need for establishing a guiding vision for the future, two business experts draw on real-life situations, people, and corporations to demonstrate how to achieve three core elements—Significant Purpose, Clear Values, and a Picture of the Future—that are needed to create and implement a vision. Reprint.

When love simmers between a reclusive scientist and a wealthy debutante, will they abandon ship or is it full steam ahead? Nicole Renard returns home to Galveston, Texas, to find her father deathly ill. Though she loves him, Nicole's father has always focused on what she's not. Not male. Not married. Not able to run Renard Shipping. Vowing to find a suitable husband to give her father the heir he desires before it's too late, Nicole sets out with the Renard family's greatest treasure as her dowry: the highly coveted Lafitte Dagger. But her father's rivals come after the dagger, forcing a change in Nicole's plans. After a boiler explosion aboard the Louisiana nearly took his life, Darius Thornton has been a man obsessed. He will do anything to stop even one more steamship disaster. Even if it means letting a female secretary into his secluded world. Nicole is determined not to let her odd employer scare her off with his explosive experiments, yet when respect and mutual attraction grow between them, a new fear arises. How can she acquire an heir for her father when her heart belongs to another? And when her father's rivals discover her hiding place, will she have to choose between that love and her family's legacy?

Mechanical Engineering was the first school of engineering to be established at Purdue University in 1882. From just 120 students, the School has grown over the last 130 years to serve over 1,800 undergraduate and graduate students annually. Originally located in Mechanics Hall, a one-story red brick building, Mechanical Engineering now has extensive facilities that include two major satellite research laboratories, Ray W. Herrick Laboratories and

Maurice J. Zucrow Laboratories, named in honor of the first director. There are more than 30 additional instructional and research laboratories, including the Roger B. Gatewood wing, which opened in 2011, and increased the space available to students and faculty by 44,000 square feet. Full Steam Ahead tells the story of the School of Mechanical Engineering and looks to a future where Purdue engineers are leading the world and making advances in biotechnology, nanotechnology, robotics, design and manufacturing, and renewable energy. Distinguished alumni included in this publication range from astronauts, like Gus Grissom and Jerry Ross, to Bob Peterson, lead writer and co-director for the Oscar-winning animated film, Up.

This theory-to-practice guide offers leading-edge ideas for wide-scale curriculum reform in sciences, technology, engineering, the arts, and mathematics--the STEAM subjects. Chapters emphasize the critical importance of current and emerging digital technologies in bringing STEM education up to speed and implementing changes to curricula at the classroom level. Of particular interest are the diverse ways of integrating the liberal arts into STEM course content in mutually reshaping humanities education and scientific education. This framework and its many instructive examples are geared to ensure that both educators and students can become innovative thinkers and effective problem-solvers in a knowledge-based society. Included in the coverage: Reconceptualizing a college science learning experience in the new digital era. Using mobile devices to support formal, informal, and semi-formal learning. Change of attitudes, self-concept, and team dynamics in engineering education. The language arts as foundational for science, technology, engineering, art, and mathematics. Can K-12 math teachers train students to make valid logical reasoning? Moving forward with STEAM education research. Emerging Technologies for STEAM Education equips educators, education researchers, administrators, and education policymakers with curricular and pedagogical strategies for making STEAM education the bedrock of accessible, relevant learning in keeping with today's digital advances.

Written by librarians who have experience with integrating technology into all subject areas and working with teens and young adults, this book is a toolkit for youth and young adult librarians--school and public--who wish to incorporate science, technology, engineering, art, and math (STEAM) into their programs and collections but aren't sure where to begin. • Provides school and public librarians with the resources and clear guidance they need to implement STEAM programs and collections at their libraries • Places librarians in a key position--based on knowledge and ability--with STEAM initiatives in their school and community • Connects STEAM programming to national standards • Explains how to secure funding and find partners to collaborate in STEAM

This book provides case studies to show what is meant by customer service: the value of satisfied customers, how to identify, meet and exceed customers' needs and expectations, and how to keep customer services under constant review and improvement. Case study examples include the Metropolitan Police and the East Sussex Health Authority. The author's previous book is Not for Bread Alone.
