## Functions Of Animal Adaptations Answer Sheet

Animals adapt to protect themselves. Many different animals have adaptations that protect them from predators. Some of these

## Download Free Functions Of Animal Adaptations Answer Key

adaptations are behavioral, allowing them to act a certain way to avoid being seen by a predator. For example, sloths move very slowly through trees making them hard to spot.

[Animal & Plant Adaptations | Science Lesson For Kids ...](#)

Locomotion serves the animal in finding food and mates and in escaping predators or unsuitable habitats. These functions of locomotion are typically correlated among different animals, so that those using the same mechanism of locomotion usually also feed, seek mates, and avoid danger in similar ways.
