The genus Goliathus (type species: Scarabaeus goliatus Drury, 1770) was reviewed adequately by WIEBES (1968) and illustrated lavishly by LACHAUME (1983). Currently, six species of Goliathus are recognized: Goliathus goliatus (Drury, 1770), Goliathus cacicus (Olivier 1789), Goliathus regius Klug, 1835, Goliathus albosignatus Boheman, 1857 (with a

## Olivier 1789 Morani

It has been mistakenly classified as a giant cockroach by some people, but it is a pure beetle, with a genus of its own, Titanus. It is a member of the Cerambycidae family, or “longhorn beetles”. Adults grow as long as 16.7 cm (6.5 in) and their mandibles are strong enough to snap a pencil in half, or cause damage to a person’s flesh. – Fact Zoo. I’ll admit, I’m scared of spiders and cockroaches, but I love beetles!

paintings the beauty of 50 beetles and 5 butterflies.

Accompanied by 21 color illustrations, this 19th-century book gives an overview of the native insects of New Zealand. Author George Vernon Hudson was an English-born entomologist and astronomer. Entomology was a life-long passion for Hudson; he completed this book at the age of 19, and when he died his collection of insects was the largest in the country.
