Focusing always on the 'spazi intermedi' or silent regions and objects that define our lives, 'The Hippopotamus' is a scrupulous record of common, daily events engaged in their sultry search for some cosmic meaning.

Throughout the search, the poet reminds his readers of the illusory jungle that surrounds them with his wry wit and subtle verbal shifts. These poems are fleeting glimpses of a magnetic and capricious universe that draws its

"He opened his suitcase and a ray of sunshine came out. -It's for when I'm afraid of the dark in the new house where I will live.-" Five little refugees traveling on a raft, in the middle of the sea, hold on to their hopes for a brighter future. It ends on a positive note. ***** 40 million refugees in the world are forced to flee their homeland under threat of persecution, conflict and violence. Children constitute about 40 percent of the world's refugees.

Can your worst enemy become the love of your life? A fun, feisty, feel-good romance for fans of Sophie Kinsella and Meg Cabot. Jennifer and Ian have known each other for seven years. They are leaders of two different teams in the same London bank, and are constantly engaged in a running battle to be number one. Ian is a handsome, wealthy and sought-after bachelor; Jennifer is a feisty, independent lawyer. When they are thrown together to work on the same project, Ian makes Jenny an offer she can't refuse: to have free reign of their rich client if she pretends to be his girlfriend. Soon, it becomes more and more difficult to tell the difference between fiction and reality... What readers are saying

visiting his lover when the woman's husband unexpectedly returns to the apartment; he climbs out the window and into the downstairs apartment, but one danger leads to another. In the dark he sees a body lying on the bed. Shortly after, another body is found, and the victim is Carmelo Catalanotti, a director of bourgeois dramas with a harsh reputation for the acting method he developed for his actors. Are the two deaths connected?

Catalanotti scrupulously kept notes and comments on all the actors he worked with, as well as strange notebooks full of figures and dates and names. Inspector Montalbano finds all of Catalanotti's dossiers and plays, the notes on the characters, and

the notes on his last drama, Dangerous Turn--the theater is where he'll find the answer.

'Only good sons have the chance of becoming real boys', warns the wise cricket. But, try as he might, Pinocchio the puppet just can't stay out of trouble. Treasure hunts, false friends and funfairs lead him far from his poor, lonely father. Is Pinocchio doomed to be wooden forever?

Science -- and the technology derived from it -- is having a dramatic impact on the quality of our personal lives and the environment around us. Science will have an even greater impact on the lives of our students. The lives of scientifically literate

students will be enriched by their understanding, appreciation, and enjoyment of the natural world. To prosper in the near future, all students must become scientifically literate and embrace the notion of life-long learning in science. Without scientific literacy, it will become impossible for students to make informed decisions about the interrelated educational, scientific, and social issues that will confront them in the future. Intended for science teachers, teacher educators, researchers, and administrators, this volume is concerned with the innovative research that is reforming how science is learned in schools. The chapters provide overviews of current research and illustrate how the findings of this

research are being applied in schools. This research-based knowledge is essential for effective science instruction. The contributors are leading authorities in science education and their chapters draw clear connections among research, theory, and classroom practice. They provide excellent examples from science classes in which their research has reformed practice. This book will help educators develop the scientific literacy of students. It bridges the gap between cutting-edge research and classroom practice to provide educators with the knowledge they need to foster students' scientific literacy.
