Even as seas rise against the shores, another great tide is beginning to rise — a tide of outrage against the pillage of the planet, a tide of commitment to justice and human rights, a swelling affirmation of moral responsibility to the future and to Earth's fullness of life. Philosopher and nature essayist Kathleen Dean Moore takes on the essential questions: Why is it wrong to wreck the world? What is our obligation to the future? What is the transformative power of moral resolve? How can clear thinking stand against the lies and illogic that batter the chances for positive change? What are useful answers to the recurring questions of a storm — threatened time — What can anyone do? Is there any hope? And always this: What stories and ideas will lift people who deeply care, inspiring them to move forward with clarity and moral courage?

Twenty essays offer observations on rivers, life, love, loss, motherhood, happiness, evolution, and country music

Do we belong to the Earth or does the Earth belong to us? The question raised by Chief Sealth almost two centuries ago continues to be the defining quandary of the wet, wild rainforests along the shores of the Pacific Northwest. It seethes below the tides of the fictional town of Good River Harbor, a little village pressed against the mountains—homeland to bears, whales, and a few weather — worn families. In Piano Tide, the debut novel by award — winning naturalist, philosopher, activist and author Kathleen Dean Moore, we are introduced to town father Axel Hagerman, who has made a killing in this remote Alaskan harbor by selling off the spruce, the cedar, the herring and halibut. But when he decides to export the water from a salmon stream, he runs head — long into young Nora Montgomery, just arrived on the ferry with her piano and her dog. Nora has burned her bridges in the lower 48, and she aims to disappear into this new homeland, with her piano as her anchor. But when Axel's next business proposition, a bear pit, turns lethal, Nora has to act. The clash, when it comes, is a spectacular and transformative act of resistance.

No one looking ahead at the middle of the last century could have foreseen the extent and the importance of the ensuing environmental crisis. Now, more than a decade into the next century, no one can ignore it. A New Environmental Ethics: the Next Millennium for Life on Earth offers clear, powerful, and oftentimes moving thoughts from one of the first and most respected philosophers to write on the environment. Rolston, an early and leading pioneer in studying the moral relationship between humans and the earth, surveys the full spectrum of approaches in the field of environmental ethics. This book, however, is not simply a judicious overview. Instead, it offers critical assessments of contemporary academic accounts and draws on a lifetime of research and experience to suggest an outlook for the future. As a result, this focused, forward-looking analysis will be a necessary complement to any balanced textbook or anthology in environmental ethics, and will teach its readers to be responsible global citizens, and residents of their landscape, helping ensure that the future we have will be the one we wish for.

Moral Ground brings together the testimony of over eighty visionaries—theologians and religious leaders, scientists, elected officials, business leaders, naturalists, activists, and writers—to present a diverse and compelling call to honor our individual and collective moral responsibility to our planet. In the face of environmental degradation and global climate change, scientific knowledge alone does not tell us what we ought to do. The missing premise of the argument and much-needed center piece in the debate to date has been the need for ethical values, moral guidance, and principled reasons for doing the right thing for our planet, its animals, its plants, and its people. Contributors from throughout the world (including North America, Africa, Australia, Asia, and Europe) bring forth a rich variety of heritages and perspectives. Their contributions take many forms, illustrating the rich variety of ways we express our moral beliefs in letters, poems, economic analyses, proclamations, essays, and stories. In the end, their voices affirm why we must move beyond a scientific study and response to embrace an ongoing model of repair and sustainability. These writings demonstrate that scientific analysis and moral conviction can work successfully side-by-side. This is a book that can speak to anyone, regardless of his or her worldview, and that also includes a section devoted to " what next " thinking that helps the reader put the words and ideas into action in their personal lives. Thanks to generous support from numerous landmark organizations, such as the Kendeda Fund and Germehausen Foundation, the book is just the starting point for a national, and international, discussion that will be carried out in a variety of ways, from online debate to " town hall " meetings, from essay competitions for youth to sermons from pulpits in all denominations. The " Moral Ground movement " will result in a newly discovered, or rediscovered, commitment on a personal and community level to consensus about our ethical obligation to the future.

In an effort to make sense of the deaths in quick succession of several loved ones, Kathleen Dean Moore turned to the comfort of the wild, making a series of solitary excursions into ancient forests, wild rivers, remote deserts, and windswept islands to learn what the environment could teach her in her time of pain. This book is the record of her experiences. It ' s a stunning collection of carefully observed accounts of her life—tracking otters on the beach, cooking breakfast in the desert, canoeing in a snow squall, wading among migrating salmon in the dark—but it is also a profound meditation on the healing power of nature. To learn more about the author, visit her website at [www.riverwalking.com](#).

Draws on a range of interdisciplinary perspectives to provide a framework for translating concepts into ecosystem-related decision-making and practice.

THE OFFICIAL NORTH AMERICAN EDITION! "Beguiling, audacious... rises to its own challenges in engaging intellectually as well as wholeheartedly with its questions about gender, genre and the concept of wilderness. The novel displays wide reading, clever writing and amusing dialogue." —The Guardian This is a new kind of nature writing — one that crosses fiction with science writing and puts gender politics at the center of the landscape. Erin, a 19-year-old girl from middle England, is travelling to Alaska on a journey that takes her through Iceland, Greenland, and across Canada. She is making a documentary about how men are allowed to express this kind of individualism and personal freedom more than women are, based on masculinist ideas of survivalism and the shunning of society: the " Mountain Man. " She plans to culminate her journey with an experiment: living in a cabin in the Alaskan wilderness, a la Thoreau, to explore it from a feminist perspective. The book is a fictional time capsule curated by Erin, comprising of personal narrative, fact, anecdote, images and maps, on subjects as diverse as The Golden Records, Voyager 1, the moon landings, the appropriation of Native land and culture, Rachel Carson, The Order of The Dolphin, The Doomsday Clock, Ted Kaczynski, Valentina Tereshkova, Jack London, Thoreau, Darwin, Nuclear war, The Letters of Last Resort and the pill, amongst many other topics. "Refreshingly outward-looking in a literary culture that turns ever inward to the self, although it still has profound moments of introspection. Uplifting, with a thirsty curiosity, the writing is playful and exuberant. Riffing on feminist ideas but unlimited in scope, Andrews focuses our attention on our beautiful, doomed planet, and the astonishing things we have yet to discover." —Ruth McKee, The Irish Times

Turn the Tide: Rise above toxic, difficult situations in the workplaceOver the past 25 years, Kathy Obeir has helped thousands of people in workshops and coaching sessions learn to effectively navigate difficult workplace situations. Now, she shares the tools and skills of her 7-Step process, The Triggering Event Cycle, so you can take back control of your emotions and successfully rise above toxic work environments.In the spirit of Bren é Brown and Martha Beck, Kathy uses stories and realistic examples to make these concepts accessible and easy to apply in your life. Her book is full of tools and exercises designed to help you rise above workplace drama and create greater teamwork, productivity, and innovation in your organization. Discover practical tools to:"De-escalate unproductive workplace conflict "Interrupt automatic fight or flight reactions "Identify what is fueling ineffective reactions"Take back control of your emotions "Rebuild working relationships"Minimize feeling triggered in the future "Turn the tide of workplace drama with greater ease and confidence.Join Kathy on this transformational journey and make this invaluable investment in yourself!

Object Lessons is a series of short, beautifully designed books about the hidden lives of ordinary things. Tree explores the forms, uses, and alliances of this living object's entanglement with humanity, from antiquity to the present. Trees tower over us and yet fade into background. Their lifespans outstrip ours, and yet their wisdom remains inscrutable, treasured up in the heartwood. They serve us in many ways-as keel, lodgepole, and execution site-and yet to become human, we had to come down from their limbs. In this book Matthew Battles follows the tree's branches across art, poetry, and landscape, marking the edges of imagination with wildness and shadow. Object Lessons is published in partnership with an essay series in The Atlantic.
