The lymphatic system - what is it and how does it work |
The lymphatic system is a circulatory system that drains fluid from the blood vessels. Lymph vessels are the site of fluid drainage and pump lymph fluid using smooth muscle and skeletal muscle action. The larger vessels contain valves to prevent backflow and pump towards the heart to return lymph fluid to the bloodstream by the subclavian veins.

Lymphatic System Structure and Function | Boundless |
What the lymphatic system is. The lymphatic system is a system of thin tubes and lymph nodes that run throughout the body. These tubes are called lymph vessels or lymphatic vessels.
