This book has been written with the requirements for students pursuing undergraduate and postgraduate dentistry courses in mind. To the authors knowledge, several standard tooth morphology books are available; however, the numerous voluminous texts becomes difficult for students to utilise during examination preparation. Therefore, this concise book (although never intended to

replace standard textbooks) acts as a fast revision tool and describes examination oriented questions, emphasising in-depth morphological aspects and carving steps for each permanent tooth in this subject on a single platform. Thus this book enlightens the target audience in a simple, logical and well-structured manner, compiled from information found within all standard textbooks of this field. It promotes and enables focused learning on the topic by sharing essential information from the basics to the level of postgraduate students pursuing specialised courses in dentistry.

The book completely covers all the topics included in the curriculum of DADH for

Dental students. It is the first revision guide in which each topic is presented in the LAQ/SAQ/MCQ format along with the clearly drawn colour diagrams for quick and easy understanding of the subject, long retention of the facts, and familiarizing the student with frequently asked questions asked in the university examinations.
