2.4 Health education about head lice encourages parents/carers and children to: Prevent head lice by regular shampooing, conditioning and daily combing of the hair. Detect head lice using a fine tooth plastic or detector comb on a weekly basis. Treat head lice as soon as an infection becomes apparent.

## **HEAD LICE GUIDANCE - [abbeyrc.bham.sch.uk](http://abbeyrc.bham.sch.uk)**

Head lice (*Pediculus humanus capitis*) are parasitic insects that infest the hairs of the human head and feed on blood from the scalp. Head lice infestation is known as pediculosis capitis. The severity of infestation varies from a few lice (less than 10) to more than 1000 in severe cases, but a typical infestation might have about 30 lice per head.

## **NICE CKS—head lice | NICE guideline | Guidelines**

The lice simply walk from one head to another. Outbreaks often occur in schools as children work and play closely together. The lice die after a couple of days away from a human scalp. What are the signs and symptoms of lice? Head lice are usually visible in the hair and on the scalp, especially during brushing. Some children might also feel itchy.

## **Lice | Great Ormond Street Hospital**

They should be encouraged to bring as many lice as are found, stuck to the relevant area of the leaflet or stuck to a piece of paper with clear sticky tape, marked with which person the head lice have come from. If lice are found, then treatment can be supplied. Dimeticone (Hedrin) is the treatment of choice, and should be used as first line.
