Open this PreTest® for: * High-yield facts for board and course review * Convenient subject organization Great for board and shelf exam preparation, too! High-Yield Basic Science PreTest® emphasizes key points you must know in: * Anatomy * Histology * Cell Biology * Biochemistry * Genetics * Pharmacology * Pathology * Physiology * Pathophysiology * Microbiology * Neuroscience * Behavioral Science

In May 2012, French voters rejected the liberalizing policies of Nicolas Sarkozy and elected his opponent, the Socialist François Hollande, president. In June 2012, the incumbent president's center-right UMP party was swept out of government in the ensuing parliamentary elections, giving way to a new center-left majority in the National Assembly. This book analyzes the contexts and results of the 2012 presidential and parliamentary elections in France. It assesses the legacies of the Sarkozy presidency that informed the 2012 electoral campaigns, scrutinizing his domestic social and economic policies on the one hand and European and foreign policies on the other. In turn, the elections' outcomes are also analyzed from the standpoint of various political parties and other institutional interests in France, and the results are situated within the broader run of French political history. Finally, the book examines the principal challenges facing the Hollande administration and new government of Prime Minister Jean-Marc Ayrault, and assesses how effectively these have been met during their first year in office.

Looking for a scholarship overseas but don't know where to start? Then this eBook is for you! This 15 chapter eBook to help you with your journey in getting your dream scholarship. We've covered everything you need in here, from preparation, application, down to moving to a new country!

This edited volume is based on the best papers accepted for presentation during the 1st Springer Conference of the Arabian Journal of Geosciences (CAJG-1), Tunisia 2018. The book compiles a wide range of topics addressing various issues by experienced researchers mainly from research institutes in the Mediterranean, MENA region, North America and Asia. Remote sensing observations can close gaps in information scarcity by complementing ground-based sparse data. Spatial, spectral, temporal and radiometric characteristics of satellites sensors are most suitable for features identification. The local to global nature and broad spatial scale of remote sensing with the wide range of spectral coverage are essential characteristics, which make satellites an ideal platform for mapping, observation, monitoring, assessing and providing necessary mitigation measures and control for different related Earth's systems processes. Main topics in this book include: Geo-informatics Applications, Land Use / Land Cover Mapping and Change Detection, Emerging Remote Sensing Applications, Rock Formations / Soil Lithology Mapping, Vegetation Mapping Impact and Assessment, Natural Hazards Mapping and Assessment, Ground Water Mapping and Assessment, Coastal Management of Marine Environment and Atmospheric Sensing.

Increased research is going on to explore the new cleaner options for the utilization of natural resources. This book aims to provide the scientific knowhow and orientation in the area of the emerging technologies for utilization of natural resources for sustainable development to the readers. The book includes production of energy and lifesaving drugs using natural resources as well as reduction of wastage of resources like water and energy for sustainable development in both technological as well as modeling aspects.

The Dynamics of Persuasion has been a staple resource for teaching persuasion for nearly two decades. Author Richard M. Perloff speaks to students in a style that is engaging and informational, explaining key theories and research as well as providing timely and relevant examples. The companion website includes materials for both students and instructors and expanding the pedagogical utilities. The sixth edition includes: updated theoretical and applied research in a variety of areas, including framing, inoculation, and self-affirmation; new studies of health campaigns; expanded coverage of social media marketing; enhanced discussion of the Elaboration Likelihood Model in light of continued research and new applications to everyday persuasion. The fundamentals of the book – emphasis on theory, clear-cut explanation of findings, in-depth discussion of persuasion processes and effects, and easy-to-follow real-world applications – continue in the sixth edition.

In the Fourth Edition of Scale Development, Robert F. DeVellis demystifies measurement by emphasizing a logical rather than strictly mathematical understanding of concepts. The text supports readers in comprehending newer approaches to measurement, comparing them to classical approaches, and grasping more clearly the relative merits of each. This edition addresses new topics pertinent to modern measurement approaches and includes additional exercises and topics for class discussion. Available with Perusall—an eBook that makes it easier to prepare for class Perusall is an award-winning eBook platform featuring social annotation tools that allow students and instructors to collaboratively mark up and discuss their SAGE textbook. Backed by research and supported by technological innovations developed at Harvard University, this process of learning through collaborative annotation keeps your students engaged and makes teaching easier and more effective.
