Racism From the Eyes of a Child is a personal reflection on racism in America through a childhood lived through the country's most separate past. Growing up during the burgeoning civil rights movement, music mogul Mathew Knowles experienced one of many firsts from integrating all-white schools in the south, up through the corporate, and later music, world. Knowles examines the backdrop of discrimination by tracing his family's roots from post-slavery up through the civil rights era, on into the present racial climate.

"There is nothing in the world like this book. It should be in every library and on the bookshelves of all those interested in cacti. The book will be an important resource for plant physiology, agronomy, and horticulture classes at both the undergraduate and graduate level."—Bruce Smith, Brigham Young University "Cacti: Biology and Uses is a landmark publication of one of the world's most unique group of plants. Park Nobel, a leading authority on succulent plants, has assembled a collection of contributions that spans a wide range of issues extending from basic systematics, anatomy, physiology and ecology to considerations of conservation and human uses of this diverse group of plants. This nicely-produced and well-illustrated volume provides a resource that will be of great use to a wide range of scientists, practitioners, and enthusiasts of this plant group."—Harold Mooney, Paul S. Achilles Professor of Environmental Biology, Stanford University

One of the largest states in Europe and the greatest of the Protestant powers, Denmark in the sixteenth and seventeenth centuries was at the height of its influence. Embracing Norway, Iceland, portions of southern Sweden and northern Germany, the Danish monarchy dominated the vital Baltic trade. However, its geopolitical importance far exceeded its modest resources. Paul Douglas Lockhart examines the short and perhaps unlikely career of Denmark as the major power of northern Europe, exploring its rise to the forefront of European affairs and its subsequent decline in fortunes following its disastrous involvement in the Thirty Years' War. Using the latest research from Danish and other Scandinavian scholars Lockhart focuses on key issues, from the dynamic role of the Oldenburg monarchy in bringing about Denmark's 'European integration', to the impact of the Protestant Reformation on Danish culture. The multi-national character of the Danish monarchy is explored in-depth, in particular how the Oldenburg kings of Denmark sought to establish their authority over their sizable-and oftentimes contentious-Norwegian, Icelandic, and German minorities. Denmark's participation in international politics and commerce is also investigated, along with the power struggle between Denmark and its rival Sweden over Baltic dominion, and the Danes' unique approach to internal governance.

"Don't play in the sun. You're going to have to get a light-skinned husband for the sake of your children as it is." In these words from her mother, novelist and memoirist Marita Golden learned as a girl that she was the wrong color. Her mother had absorbed "colorism" without thinking about it. But, as Golden shows in this provocative book, biases based on skin color persist—and so do their long-lasting repercussions. Golden recalls deciding against a distinguished black university because she didn't want to worry about whether she was light enough to be homecoming queen. A male friend bitterly remembers that he was teased about his girlfriend because she was too dark for him. Even now, when she attends a party full of accomplished black men and their wives, Golden wonders why those wives are all nearly white. From Halle Berry to Michael Jackson, from Nigeria to Cuba, from what she sees in the mirror to what she notices about the Grammys, Golden exposes the many facets of "colorism" and their effect on American culture. Part memoir, part cultural history, and part analysis, Don't Play in the Sun also dramatizes one accomplished black woman's inner journey from self-loathing to self-acceptance and pride.

Major changes have occurred in the last few years in the methods of cutting and manufacturing outerwear. Light clothing companies are now manufacturing these heavy garments because of the development of fusible interlinings and new manufacturing techniques which have resulted in the deskilling of traditional tailoring methods. Outerwear has consequently assumed much greater importance in light clothing courses and this book - the first of its kind - has been written to reflect these industrial changes. It offers a course of practical and theoretical study which is related to specific garment types and fabrics. An essential manual for students at every level. Suitable for use in CGLI, BTEC and degree courses, this uniquely comprehensive work is certain to become a standard textbook on its subject.

This leading strategy text presents the complexities of strategic management through up-to-date scholarship and hands-on applications. Highly respected authors Charles Hill and Gareth Jones integrate cutting-edge research on topics including corporate performance, governance, strategic leadership, technology, and business ethics through both theory and cases. Based on real-world practices and current thinking in the field, the Ninth Edition of Strategic Management features an increased emphasis on the changing global economy and its role in strategic management. The high-quality case study program contains 30 cases covering small, medium, and large companies of varying backgrounds. All cases are available in the main student text or the core case text.

This unparalleled reference spans the entire scope of world history offering a thorough investigation into the most infamous crimes and their perpetrators throughout recorded time. Each chapter begins with an essay that introduces the topic and provides a concise overview of the historical, social, and often, political significance of the crime.

A co-publication of the World Bank, International Finance Corporation and Oxford University Press
