The objective of this book
is to organize and document
the technical, analytical,
and practical aspects of
present-day apple

processing. No collected works have been published on processed apple products for more than thirty years.

During that time many changes have taken place in the apple-processing industry. There are fewer

but larger plants processing
apples from larger
geographical areas because
of advances in
transportation and storage
of fruit. In addition
sophisticated technical
advances in the processing

been made to provide a central source of historical, currently practical, and theoretical information on apple processing. References have been cited to give credibility and assist those
