~~Treatment of Language Disorders  
in Children~~

Speech and language intervention can take the form of training parents to work with their own children to improve their speech. Such programs are effective in improving the child's language and also at changing the mother's speech patterns. Parents must be trained and monitored by a speech therapist for this strategy to be useful.

~~Speech Language Intervention  
Strategies | Synonym~~

Having a language or speech delay or disorder can qualify a child for early intervention (for children up to 3 years of age) and special education services (for children aged 3 years and older).
