Fruit Breeding is the eighth volume in the Handbook of Plant Breeding series. Like the other volumes in the series, this volume presents information on the latest scientific information in applied plant breeding using the current advances in the field, from an efficient use of genetic resources to the impact of biotechnology in plant breeding. The majority of the volume showcases individual crops, complemented by sections dealing with important aspects of fruit breeding as trends, marketing and protection of new varieties, health benefits of fruits and new crops in the horizon. The book also features contributions from outstanding scientists for each crop species. What does it mean to be Zulu today? Does being Zulu today differ from what it meant in the past? "Zulu Identities" wrestles with these and many other related questions to show how the characteristic traditions of a pre-industrial people have evolved into different cultural expressions of "Zulu-ness" in modern South Africa. This authoritative and specially commissioned volume, which contains more collected expertise on the Zulus than is available from any other source, examines the legacies of Shaka, the intrigues of Zulu royalty, gender and generational struggles, cultural and symbolic projections, and spirituality. It highlights the debates in contemporary South Africa over the manipulation of Zulu heritage, whether deployed for party political purposes or exploited to promote eco- and battlefield-tourism. And finally the book contemplates the future of Zulu identity in a unitary South Africa seeking to embrace the forces of globalization.

An urban swindler finds his way to the village of Nyanyadu in rural South Africa where he dupes the villagers with the promise of untold riches.
