That's Chemistry! is a concise manual of ideas, activities and investigations about the science of materials and their properties for teachers to use with primary age children. All experiments in this book have been trialed in schools. It is designed for both specialist and non-specialist primary teachers, to encourage interest and enthusiasm in a new generation of scientists.

This book aims to cover the specifications of the main examination boards for GCSE Double Science, GCSE Single Science and the core content of GCSE Chemistry. Where relevant, Key Stage 3 material is summarized as an introduction to GCSE topics. This serves as revision of work done prior to Key Stage 4, and a foundation for GCSE studies. The book is also useful to teachers as a handy reference and planner. Each page is presented diagrammatically in an attractive way using illustrations, tables and some photographs. Diagrammatic presentations are used as much as possible in order to make it easier for students to recall information and understand the principles involved. Bullet points and questions are used to emphasize the essential content of each page. There are also review questions for every section.

A student-friendly approach to KS3 This coursebook covers topics appropriate for KS3 Year 7 Science and accurately reflects the language and content of the new Programme of Study. Along with the Year 8 and 9 coursebooks full coverage of the KS3 programme of study is provided.
