What's the best way to make a navigation bar that will help people find their way around my site? In a small nest in a large oak tree, the drama begins. A young American Robin breaks open his shell and emerges into a world that will provide the warmth of sunny days and the life-threatening chill of cold, rainy nights; the satisfaction of a full stomach and the danger of sudden predator attacks; and the chance to mature into an adult robin who'll begin the cycle of life all over again come next spring. In The Seasons of the Robin, Don Grussing tells the uncommon life story of one of the most common birds, the North American Robin. Written as fiction to capture the high drama that goes on unnoticed right outside our windows, the book follows a young male robin through the first year of life. From his perspective, we experience many common episodes of a bird's life—struggling to get out of the egg; awkwardly attempting to master flight; learning to avoid predators; migrating for the first time; returning home; establishing a territory; finding a mate; and beginning the cycle again. This creative approach of presenting natural history through a fictional, yet factually based, story allows us to experience the spine-tingling, nerve-wracking, adrenaline-flowing excitement that is so much a part of the life of every wild thing. As Don Grussing concludes in his preface, "Once you experience the world through a robin's eyes, I hope you'll look at every wild thing with new appreciation and respect for what they accomplish by living."

Essays, discussions, and image portfolios map the evolution of art forms engaged with the Internet. Since the turn of the millennium, the Internet has evolved from what was merely a new medium to a true mass medium—with a deeper and wider cultural reach, greater opportunities for distribution and collaboration, and more complex corporate and political realities. Mapping a loosely chronological series of formative arguments, developments, and happenings, Mass Effect provides an essential guide to understanding the dynamic and ongoing relationship between art and new technologies. Mass Effect brings together nearly forty contributions, including newly commissioned essays and reprints, image portfolios, and transcribed discussion panels and lectures that offer insights and reflections from a wide range of artists, curators, art historians, and bloggers. Among the topics examined are the use of commercial platforms for art practice, what art means in an age of increasing surveillance, and questions surrounding such recent concepts as "postinternet." Other contributions analyze and document particular works by the artists of And/Or Gallery, Cory Arcangel, DIS, Cao Fei, the Radical Software Group, and others. Mass Effect relaunches a publication series initiated by the MIT Press and the New Museum in 1984, which produced six defining volumes for the field of contemporary art. These new volumes will build on this historic partnership and reinvigorate the conversation around contemporary culture once again.
