1. Explore the need for an MES and identify the major problems and scope for improvement required in the plant floor. In other words, prepare a Business case analysis.
2. Discuss and define the MES feature scope of the project with stakeholders such as shop floor executives, Internal IT, controls and automation.
3. Develop detailed user requirements.

Control Engineering | Tips for a successful MES ...

Manufacturing execution systems are computerized systems used in manufacturing to track and document the transformation of raw materials to finished goods. MES provides information that helps manufacturing decision makers understand how current conditions on the plant floor can be optimized to improve production output. MES works in real time to enable the control of multiple elements of the production process. MES may operate across multiple function areas, for example: management of product de
