Written with the cooperation of Liam Howlett, this biography of The Prodigy charts their rise from Essex ravers to festival headliners and international stars.

Provides an account of how, shortly before World War II, a heroic Naval officer named Swede Momsen led the efforts to save thirty-three men trapped in a sunken submarine.

Emphasizes the design, control and functioning of various unit operations - offering shortcut methods of calculation along with computer and nomographic solution techniques. Provides practical sections on conversion to and from SI units and cost indexes for quick updating of all cost information.; This book is designed for mechanical, chemical, process design, project, and materials engineers and continuing-education courses in these disciplines.

In this work, the authors present a global perspective on the methods available for analysis and design of non-linear control systems and detail specific applications. They provide a tutorial exposition of the major non-linear systems analysis techniques followed by a discussion of available non-linear design methods.

A unique tribute to art films as seen through the eyes of master cinematographer Vittorio Storaro, the winner of three Academy Awards. The volume is a compendium of Storaro's extraordinary fifty-year career and a tribute to the creative sources of his work, as celebrated through more than 500 illustrations that reflect his singular style. In cinematography, there is not just one kind of light, but an infinite range of variants: not only the day and night specified in the screenplays, but also the daylight and artificial light, the darkness and the twilight, the sunrise and the sunset, the sun and the moon. And each one tells a story, expresses an idea or an emotion, and digs down into the subconscious. "The Muses" are the female figures of Greek mythology who have inspired the cinematography of Storaro in terms of aesthetics, light, color, and value.
