The Communications Market 2020 - Ofcom

Characterizing the transcriptome of individual cells is fundamental to understanding complex biological systems. We describe a droplet-based system that enables 3' mRNA counting of tens of thousands of single cells per sample. Cell encapsulation, of up to 8 samples at a time, takes place in ~6 min, ...

Massively parallel digital transcriptional profiling of ...

RNA demethylase has recently been known to be associated with cancer development but its selective inhibitors as anti-cancer agents have rarely been investigated to date. Herein, we have developed a fluorescent nanobiosensor which enables efficient quantitative analysis of RNA demethylase ALKBH5 activity and shows a high potential for robust inhibitor screening.

A fluorescent nanobiosensor for the facile analysis of m6A ...
