When writing an interview into a news story, or any other type of article, it is important to make sure you have a great title that makes readers want to read your piece. The title should be between four and nine words; anything less than four words tells the reader that you couldn't think of anything, but any more than nine words is too wordy and usually causes confusion to the reader.

From respected journalist, professor, and founder of the Writer's Symposium by the Sea, a book that demystifies the art and science of interviewing, in the vein of On Writing Well or How to Read Literature Like a Professor. "Dean Nelson is one of the best interviewers around."—Anne Lamott Interviewing is the single most important way journalists (and doctors, lawyers, social workers, teachers, human resources staff, and, really, all of us) get information. Yet to many, the perfect interview feels more like luck than skill—a rare confluence of rapport, topic, and timing. But the thing is, great interviews aren't the result of serendipity and intuition, but rather the result of careful planning and good journalistic habits. And Dean Nelson is here to show you how to nail the perfect interview every time. Drawing on forty-years of award-winning journalism and his experience as the founder and host of the Writer's Symposium by the Sea, Nelson walks readers through each step of the journey from deciding whom to interview and structuring questions, to the nitty gritty of how to use a recording device and effective note-taking strategies, to the ethical dilemmas of interviewing people you love (and loathe). He also includes case studies of famous interviews to show readers how these principles play out in real time. Chock full of comprehensive, time-tested, gold-standard advice, Talk to Me is an indispensable guide to the subtle art of the interview guaranteed to afford readers with the skills and confidence they need the next time they say, "talk to me."

What is news? Why does news turn out like it does? What factors influence the creation, production, and dissemination of news? Cultural Meanings of News takes on these deceptively simple questions through an essential collection of seminal and contemporary studies by leaders in the fields of mass communication and media studies. Similar in format and purpose to editor Dan Berkowitz's award-winning Social Meanings of News, this new volume represents a conceptual update, a continuation of the discourse about the nature of news and how it comes to be, moving ideas ahead from the earlier tradition of sociological approaches to the more pervasive cultural perspectives that inform understandings about news. Cultural Meanings of News provides a carefully selected set of readings, organized into thematic areas that each probe a dimension of the literature: from sociological roots to cultural perspectives; news as narrative and cultural text; newswork as cultural ritual; news as cultural myth; news and its interpretive communities; news as a source and reflection of collective memory; toward the future of news research. This text-reader provides students and scholars with first-hand exposure to cultural approaches to the study of news, while also providing an organizing framework for understanding the commonalities and differences between threads in the research. The goals are to engage readers through guided immersion in the material.

**Publisher Description**  
This volume is the first book-length study of disguised forms of plagiarism that mar the body of published research in humanities disciplines. As a contribution to applied research ethics, this practical guide offers a typology of the principal forms of disguised plagiarism. It provides detailed analyses, in-depth case studies, and useful flow charts to assist researchers, editors, and publishers in protecting the integrity of the body of published research literature. Disguised plagiarism is more subtle than copy-and-paste plagiarism; all its varieties involve some additional concealment that creates further distance between the plagiarizing text and its source. These disguised forms are the most difficult forms of plagiarism to detect. Readers of the volume will become acquainted with the subtler forms of plagiarism that corrupt the production and dissemination of knowledge in humanities fields. The book is valuable not only to those interested in research ethics, but also to those in humanities fields including philosophy, theology, and history.

Searchable electronic version of print product with fully hyperlinked cross-references.

This deft and thorough update ensures that The Wildlife Techniques Manual will remain an indispensable resource, one that professionals and students in wildlife biology, conservation, and management simply cannot do without.

This book contains the contributions presented at the 3rd international KES conference on Smart Education and Smart e-Learning, which took place in Puerto de la Cruz, Tenerife, Spain, June 15-17, 2016. It contains a total of 56 peer-reviewed book chapters that are grouped into several parts: Part 1 - Smart University: Conceptual Modeling, Part 2 – Smart Education: Research and Case Studies, Part 3 – Smart e-Learning, Part 4 – Smart Education: Software and Hardware Systems, and Part 5 – Smart Technology as a Resource to Improve Education and Professional Training. We believe that the book will serve as a useful source of research data and valuable information for faculty, scholars, Ph.D. students, administrators, and practitioners - those who are interested in innovative areas of smart education and smart e-learning.

Launch yourself into the new news economy. The digital revolution that provides so many options for news consumers also means massive opportunity for journalists. The trick: see the disruption as an opening you can attack. Entrepreneurial Journalism will inspire you with what's possible and show you the mechanics behind building a business. Working through eight clear and concise stages, you'll explore the secrets of successful news startups (including how they're making money) and learn how to be an upstart yourself, building an innovative and sustainable news business from scratch. Each chapter starts with a real entrepreneur's experience, teasing out how savvy and opportunistic journalists found their way to success. Mark Briggs then helps you size up the market, harness technology, turn your idea into a product or service, explore revenue streams, estimate costs, and launch. "Build Your Business" action items at the end of each chapter get you thinking through each step of your business plan. Discover how traditional news organizations are evolving and innovating, where the jobs are today and where the new jobs will be tomorrow. Learn from the pioneers, and become one.

Scientific communication is challenging, conclusions are rarely clear cut making communicating statistical risk and probability tough, especially to non-statisticians and non-scientists such as journalists.In this book John Clare illustrates how to communicate clearly the risks and benefits contained in a complex data set, and balance the hope and the hype. He explains how to avoid the 'miracle cure' or 'killer drug' headlines which are so common and teaches you how to combine the accuracy of peer-to-peer reviewed science with the narrative skills of journalism.
