Proprietors of home and small offices will learn how to streamline their electronics budget and boost computer productivity in this step-by-step guide to buying and managing low-cost, high-yield computer systems. The guide describes in plain English the kinds of hardware and software to buy, where to purchase them for less money, how to install and operate them, and how to integrate system components so that they work together as a seamless digital whole. With an enlightened understanding of their digital workspace, small business owners will boost business performance, save money, and free up time for more essential office tasks.

InfoWorld is targeted to Senior IT professionals. Content is segmented into Channels and Topic Centers. InfoWorld also celebrates people, companies, and projects.

Tired of spending more time with filing cabinets than with clients? Is overhead eating up margins? Now, two leading financial planners and columnists deliver the help advisers have been begging for. Virtual-Office Tools for a High-Margin Practice is a nontechnical trove of technology, clever workarounds, and procedural efficiencies tailored to help financial advisers move toward a paperless office, while still complying with SEC record-keeping requirements. The authors show planners how to reduce the amount of paperwork in their offices by 99 percent, slash overhead, and find anything they need in one minute or less by adapting innovative software tools and shifting from on-site employees to remote assistants and virtual work partners. Until now, creative ways of working this smart were hard to come by. With this book, they are available, ready to go, and easy to implement.

Covers connecting to the Internet, maintenance, applications, and multimedia features.

A timely and apposite treatise on Papua New Guinea's economic environment, this book explores business organizations law and various aspects of commercial law in Papua New Guinea in a readable and informative style. Business and commerce is the twin engine that propels the economy of a modern

nation. They ensure steady economic growth and development. In an age of globalization, they assume even greater importance than at any other time in human history. A nation risks being marginalized or left behind in the race for a share of the world economic market unless it ensures the stability of its business and commercial sector. Trade regulation, good governance and democratic institutions go hand in hand in guaranteeing political and social equilibrium. As such the laws designed to facilitate trade and commerce are a vital component of the political and social equation. This is a valuable book for law students, legal practitioners, accountants and business executives, not only within Papua New Guinea, but also in Australia and throughout the South Pacific.

This book includes a set of rigorously reviewed world-class manuscripts addressing and detailing state-of-the-art research projects in the areas of Computing Sciences, Software Engineering and Systems. The book presents selected papers from the conference proceedings of the International Conference on Systems, Computing Sciences and Software Engineering (SCSS 2006). All aspects of the conference were managed on-line.
