Ptolemy's Almagest is one of the most influential scientific works in history. A masterpiece of technical exposition, it was the basic textbook of astronomy for more than a thousand years, and still is the main source for our knowledge of ancient astronomy. This translation, based on the standard Greek text of Heiberg, makes the work accessible to English readers in an intelligible and reliable form. It contains numerous corrections derived from medieval Arabic translations and extensive footnotes that take account of the great progress in understanding the work made in this century, due to the discovery of Babylonian records and other researches. It is designed to stand by itself as an interpretation of the original, but it will also be useful as an aid to reading the Greek text.

Ear Rent is a new book of poetry by the author and artist Robert Benefiel. The title is derived from suggesting the price one pays to get the attention of another, as well as having been used as a term to have one's ear cut off to pay back a debt. By titling this new collection of poetry Ear Rent he

understands he is asking the reader to stop and listen to what he has to say, but that he is also paying off his debt to society by giving it back the poems it influences. Derived from no one style, the work can come from completely surreal vestiges, or from plain and ordinary circumstances. Whether looking at a rubber toy starring at him from the bottom of a bathtub, relaying a news article, or enjoying the beauty of a surreal moment of hickory trees being on fire, each poem represents just one of the many ways the author is responding to the world tapping on his shoulder and asking for the time.

"Farm life in central Michigan." Cf. Hanna, A. Mirror for the nation.

Create media-rich client applications using JavaFX 9 and the Java 9 platform. Learn to create GUI-based applications for mobile devices, desktop PCs, and even the web. Incorporate media such as audio and video into your applications. Interface with hardware devices such as Arduino and Leap Motion. Respond to gesture control through devices such as the Leap Motion Controller. Take advantage of the new HTTP2 API to make RESTful web requests and WebSockets calls.
