From the bestselling 1001 series, comes a collection of 1001 quotations from numerous brilliant minds of the Ancient World through to the present day. With quotes from everyone including Marcus Aurelius, Sun Tzu, Shakespeare and Nietzsche through to Ellen DeGeneres, Nelson Mandela, Mark Zuckerberg and Monty Python's Flying Circus, there is an immense range of ideas, witticisms and musings to ponder. The quotations cover a wide range of topics, including art and literature, culture, philosophy, politics, psychology and religion, made accessible and brought to life by being placed in their historical contexts and accompanied by a wealth of illustrations.

Leading scientists offer detailed profiles of ten protein drugs currently in development. The case histories of these important new compounds are described from the perspective of their formulation, characterization, and stability. This ready reference also features recent data and an abundance of previously unpublished information. The in-depth coverage includes a highly useful compendium of degradation sites occurring in over 70 proteins. An invaluable aid in the rapid identification of potential 'hot spots' in proteins, this accessible compilation allows for inspection of the protein's primary structure and preparation of a hydroflex plot.

Despite the fact that the majority of emigration today originates in the global south, most research has focused on the receiving states of Europe and North America, while very little attention has been paid to the policies of the sending states toward emigration or toward their nationals abroad. Taking the country cases of Morocco, Tunisia, Lebanon and Jordan, this work explores the relationship between the government of the sending states, the outmovement of their citizens and the communities of expatriates that have developed. By focusing on the evolution of government institutions charged with various aspects of expatriate affairs, this work breaks new ground in understanding the changing nature of the relationship between expatriates and their home state. Far from suggesting that the state is waning in importance, the conclusions indicate that this relationship provides evidence both of state resilience and of new trends in the practice of sovereignty.

Explains how young adult librarians can utilize core competencies to improve teen services.

"The greater our knowledge increases, the more our ignorance unfolds." U. S. President John F. Kennedy, speech, Rice University, September 12, 1962 My primary purpose for writing this book was much more than to provide another information source on Chemistry, Manufacturing & Controls (CMC) that would rapidly become out of date. My primary purpose was to provide insight and practical suggestions into a common sense business approach to manage the CMC regulatory compliance requirements for biopharmaceuticals. Such a common sense business approach would need (1) to be applicable for all types of biopharmaceutical products both present and future, (2) to address the needs of a biopharmaceutical manufacturer from the beginning to the end of the clinical development stages and including post market approval, and (3) to be adaptable to the constantly changing CMC regulatory compliance requirements and guidance. Trying to accomplish this task was a humbling experience for this author! In Chapter 1, the CMC regulatory process is explained, the breadth of products included under the umbrella ofbiopharmaceuticals are identified, and the track record for the pharmaceutical and biopharmaceutical industry in meeting CMC regulatory compliance is discussed. In Chapter 2, while there are many CMC commonalities between biopharmaceuticals and chemically-synthesized pharmaceuticals, the significant differences in the way the regulatory agencies handle them are examined and the reasons for why such differences are necessary is discussed. Also, the importance of CMC FDA is stressed.

The Skit Guys--the wildly popular comedic duo--deliver 20 side-splitting skits for your children's ministry. You'll find entertaining faith-focused skits on a variety of topics you can use as a boost to your messages and lessons for kids. Each skit comes with five discussion questions to engage kids in faith discoveries. You'll get 20 impactful and power-packed skits, including: * Creation * Noah's Ark * David & Goliath * Jonah & the Big Fish * Daniel in the Lions' Den * And 15 additional skits to go with your Bible lessons. With Sticky Bible Skits, your kids will have fun presenting--and watching--Bible truths come to life. Kids will be excited to share what they've learned and eager to come back next week. Make Sticky Bible Skits a part of your ministry to kids so they'll learn about the Bible in ways they'll never forget.

This book is a step-by-step practical guide on how to achieve successful projects in EPC/turkey contracting and construction. Mapping out the shape of a project, the book spells out where things often go wrong, where and why disputes arise, and how to avoid conflicts. It is a key reference point for all involved in the contract, making it attractive to legal practitioners, construction industry professionals, and government officials involved with these projects.

Informed by and against the backdrop of the 2019 European Parliament (EP) elections, this innovative book provides a critical assessment of where Europe stands in terms of the quest to achieve democratic legitimacy. Since the 2014 EP elections, the European Union (EU) has experienced multiple crises, which arguably have undermined its legitimacy. The 2019 EP elections were hence seen as a crucial moment in the EU's attempts to show resilience and regain trust. Using political science and legal frames of analysis, Assessing the 2019 European Parliament Elections provides an understanding and assessment of the current politico-legal framework, and its impact on European elections. Furthermore, using original data, it provides a timely examination of public opinion issue priorities and voting behaviour at the 2019 EP elections in eight countries. Given the critical conjuncture that the 2019 EP elections represent, this volume provides a key contribution to understanding both the dynamics surrounding the elections, as well as voters' responses, and informs debates on European politics, for example, second-order elections, democratic legitimacy and political representation. This book will be of key interest to scholars and students of EU politics, public administration, European studies, European law, and sociology, along with practitioners in politics, journalism, and policy analysis.

Recently separated Phil Ockerman falls hard for Bertha Strunk at a tango lesson in Clerkenwell. Bertha also bears a strong resemblance to the seventeenth-century Venetian singer and composer Barbara Strozzi (with whom Phil happens to be obsessed), to the point where Phil is no longer sure which is which... Navigating several London Underground lines and considerable planetary activity, Russell Hoban's intriguing romance tangos its way through a world of infidelity, artificial eyeballs, baseball bats and music - never missing a daring, seductive step.

Due to the characteristics of electricity, power markets rank among the most complex markets operated at present. The requirements of an environmentally sustainable, economically efficient, and secure energy supply have resulted in the emergence of several interrelated markets that have to be carefully engineered in order to ensure efficient market outcomes. This book presents an agent-based simulation model that facilitates electricity market research. Simulation outcomes from this model are validated against price data from German power markets. The results significantly contribute to existing research in agent-based simulation and electricity market modeling, and provide insights into the impact of the market structure and market design on electricity prices. The book addresses researchers, lecturers and students who are interested in applying agent-based simulation to power markets. It provides a thorough discussion of the methodology and helpful details for model implementation.
